769-775/799-805 MHz Regional Plan for Region 18 (Louisiana)

This document is the Regional Plan for Region 18 (Louisiana) describing how the 769-775/799-805 MHz General Use frequencies will be allocated and implemented in the Region.

1.1 Regional Chair

Michael W. Musselman, Communications Officer
St. George Fire Protection District
3773 Harding Blvd.
Baton Rouge, LA 70807-5222
Phone: (225) 389-2057
Fax: (225) 389-2049
Email: mwmusselman@stgeorgefire.com

1.2 Regional Vice-Chair

William Vincent
Lafayette Parish Communication District (Ret.)
300 Millcreek Rd.
Lafayette, LA 70508
Phone: (337) 291-5060
Fax: (337) 291-5080
Email: billvincent@cox.net

Region 18 Description

- 1.1** Region 18 encompasses the entire state of Louisiana, consisting of 64 parishes. An alphabetical list of the individual parishes can be found listed in Appendix C.

Length x Width	Louisiana is about 380 miles (612 kilometers) long and 130 miles (209 kilometers) wide.
Geographic Center	The geographic center of Louisiana is located in Avoyelles Parish, 3 miles (4.8 kilometers) SE of Marksville. Longitude: 92° 32.2'W Latitude: 30° 58.1'N
Borders	Louisiana is bordered by Arkansas on the north and the Gulf of Mexico on the south. Mississippi borders Louisiana on the east and Texas borders Louisiana on the west.
Total Area	Louisiana covers 51,843 square miles (83,433 kilometers), making it the 31st largest of the 50 states.
Land Area	43,566 square miles (70,112 kilometers) of Louisiana are land areas.
Water Area	8,277 square miles (13,321 kilometers) of Louisiana are covered by water.
Highest Point	The highest point in Louisiana is Driskill Mountain at 535 feet (163 meters) above sea level.
Lowest Point	The lowest point in Louisiana is 8 feet (2.4 meters) below sea level in New Orleans. This is the second lowest place in the country.
Mean Elevation	The Mean Elevation of the state of Louisiana is only 100 feet (30.5 meters) above sea level.
Major Rivers	Atchafalaya River, Mississippi River, Ouachita River, Red River, Sabine River
Major Lakes	Calcasieu Lake, Catahoula Lake, Grand Lake, Lake Maurepas, Lake Pontchartrain, Toledo Bend Reservoir, White Lake
Gulf of Mexico	All coastal parishes jurisdiction includes out to three miles into the Gulf of Mexico
Strategic Oil Reserves	Louisiana is the site of several of the nation's strategic oil reserve facilities
Louisiana Offshore Oil Port (LOOP)	This national critical facility is in Lafourche Parish, Louisiana with Operations in Galliano and the Gulf facility at Port Fourchon.

There are 834.94 miles (1343.7 kilometers) of “Primary” interstate highways and 57.72 miles (92.9 kilometers) of “Secondary” interstate highways (feeders or loops) for a total of 892.66 miles (1436.6 kilometers). These interstates pass through one or more major population areas listed below, with the exception of Terrebonne Parish.

The estimated population of Louisiana in 2014 is 4,649,676.

<http://quickfacts.census.gov/qfd/states/22000.html>

864,445 or 18.6% of the State’s population was in the Greater New Orleans area (Orleans, Jefferson, & St. Bernard parishes). 723,907 or 15.6% is in the Greater Baton Rouge area (East Baton Rouge, West Baton Rouge, Ascension, & Livingston parishes). 419,164 or 9% is north & east of the New Orleans & Baton Rouge areas (St. Tammany, Tangipahoa, & Washington parishes).

Rapides Parish, encompassing Alexandria, LA has a population of 132,488. Bossier Parish, encompassing Bossier City, LA has a population of 125,064. Caddo Parish, encompassing Shreveport, LA has a population of 252,603. Lafayette Parish, encompassing Lafayette, LA has a population of 235,644. Calcasieu Parish, encompassing Lake Charles, LA has a population of 197,204. Ouachita Parish, encompassing Monroe, LA has a population of 156,325. Terrebonne Parish, encompassing Houma, LA has a population of 113,328.

Louisiana is bordered to the west by Region 51 (Southeast Texas) and Region 40 (Northeast Texas), to the north by Region 4 (Arkansas), and to the east by Region 23 (Mississippi). The southern border of Louisiana is the Gulf of Mexico.

2.1 Summary of the Major Elements of the Plan

The major elements of this Plan follow the National Coordination Committee (NCC) guidelines. The major elements of this Plan are (1) the declaration that this is the Region 18 Plan, (2) that Region 18 encompasses the entire State of Louisiana, (3) the administration and operation of the Committee, (4) 700 MHz interoperability, (5) General Use spectrum management (6) allocation requests, (7) dispute resolution, (8) adjacent region coordination and (9) the appendices including channel allocations.

2.2 Notification Process

The 800 MHz NPSPAC Region 18 Chairperson, William R. Vincent acted as the 700 MHz Convener. A 700 MHz Regional Planning Committee meeting date was set for August 31, 2001. Notification to interested parties began sixty (60) days prior to the first meeting. Announcements indicating the date, time and location of the first meeting were sent by email to the FCC Wireless Telecommunications Bureau and, posted in the following industry periodicals: Association of Public Safety Communications Officials, Inc. magazine, Firehouse.com and the New Orleans *Times Picayune*. The Associations notified were as follows:

LA Association of Public-Safety Communications Officials
Association of Public-Safety Communications Officials
LA National Emergency Number Association
Public Safety Wireless Network
Forestry-Conservation Communications Association
International Association of Chiefs of Police
International Bridge Turnpike & Tunnel Association
International Municipal Signal Association
International Association of Fire Chiefs
American National Red Cross
American College of Emergency Physicians
National Association of State EMS Directors
Federal Emergency Management Agency
US Conference of Mayors
National Public Safety Telecommunications Council
National Governors Association
National Volunteer Fire Council
Louisiana Public Safety Planning Advisory Committee
Bureau of Indian Affairs
700 MHz Region 40 – Texas (Central & Northeast)
700 MHz Region 51 – Texas (East)

All subsequent meetings were sent to FCC and issued as a Public Notice. Meeting Notices were also sent to all attendees of the previous meetings as well as the Association of Public Safety Communications Officials for publication. Notices were also sent to all Native American Tribes within Louisiana and to non-governmental organizations involved in support of public safety. The meetings were publicized at meetings of the Louisiana Chapters of the Association of Public-Safety Communications Officials and the National Emergency Number Association.

2.3 Operations of the Regional Plan Committee

This committee will use *Simplified Parliamentary Procedures* to conduct meetings. This method allows for all members to have their voice heard. All decisions will be by clear consensus vote with each public safety agency in attendance having one (1) vote. Additional voting member considerations are listed in the Region 18 Bylaws, Appendix A. The meetings are open to all interested persons and public input time is provided for anyone to express a viewpoint or to have input to the regional planning process. Subcommittees may be formed as needed to work on specific issues. Any changes to the Regional Plan must be voted and approved by the full Regional Planning Committee. Participation in subcommittees is open to any member. The Chair of the Regional Planning Committee appoints each subcommittee Chair.

Regional Plan Administration

3.1 Region 18 Review Committee

Upon approval of this Plan by the FCC, a Region 18 Review Committee will be established as a subcommittee of the Region 18 Planning Committee from among its membership for the purposes of the initial review and processing of applications, for monitoring the implementation of those systems, for recommending modifications and amendments to the Plan, for performing any other duties assigned to it by the Plan, and for exercising general oversight of the Plan.

3.2 Procedure for Requesting Spectrum Allotments

- A. Upon FCC approval of this Plan, Region 18 will announce to the Region that 700 MHz public safety channels are available in the Region and that channels have been assigned to pool allotments to parishes within the Region. All available methods will be used to notify public safety entities of channel availability in the Region. All requests will be considered on a first come, first served basis. Region 18 supports the National Coordination Committee Pre-Assignment Rules/Recommendations listed in Appendix F, and will use these guidelines as a template to determine if an application submitted to the Regional Planning Committee meets regional planning standards. All applications must include a certification by the consulting engineer or other qualified person that the system will be engineered, built, and installed to operate within the parameters of the accompanying application, and that the application meets all requirements and is in compliance with the Region 18 Plan. It is recommended that applicants familiarize themselves with these requirements prior to submitting applications for Region 18 700 MHz public safety system implementation.

There shall be twelve filing windows per year corresponding to the calendar months. The first filing window shall be the first full calendar month after the date of FCC approval of this Plan. All applications received during the same calendar month shall be evaluated and prioritized together in accordance with the criteria outlined in Section 4.1.

In general and unless otherwise noted, the Region 18 Regional Planning Committee will adhere to the published National Coordination Committee Implementation Guidelines for 700 MHz Public Safety Regional Planning Committees.

- B. When applying for new 700 MHz channels, the Regional Planning Committee encourages applicants to relinquish an amount of currently used spectrum (“give back channels”) and make that spectrum again available for use within the region. This currently licensed spectrum may be in any public safety band. Agencies with existing licensed 800 MHz systems that are requesting 700 MHz channels for integrated 700/800 system expansion will not fall under this

requirement. In such a combined system however, all channels, 700 MHz and 800 MHz, will be considered in determining loading requirements. An agency may retain channels that are used for paging, telemetry, microwave or other functions wherein the 700 MHz spectrum does not meet the agency's need.

When an applicant submits a request for 700 MHz spectrum, a "Give Back Plan" should accompany the application. This Plan should show what frequencies would be vacated, a time line for the transition and what channels are being retained. If an existing channel is being retained for interoperability purposes, please identify that channel in the "Give Back Plan".

Frequency "give back" requirements shall hold true for regional systems where system constituents maintain discrete licenses for their own internal operations. In this case, constituent political subdivisions or agencies are required to participate in the "give back" plan. Should a political subdivision or agency act as host of a regional system, both the host agency and the constituent agencies must participate in the "give back" plan.

Frequencies used for non-voice critical infrastructure support functions [Supervisory Control and Data Acquisition (SCADA) systems] as well as frequencies that are used for interoperability with other regional, state or national agencies that rely on one certain frequency band for emergency operations, such as, but not limited to "Fire Mutual Aid (154.280 MHz) VFIRE21", or the "National Law Enforcement Emergency Channel (155.475 MHz) VLAW31" may be exempted as candidates for "give back". Frequencies used by an applicant for such purposes, as well as the specific use and a network/ system diagram, must be specified in supportive documentation supplied with the application to enable the consideration of any possible exemption.

Operational Fixed, or any frequency or radio sub-system used for fixed mode of operations to support the operation of another radio system shall be considered part of the give back along with the fundamental system being returned for reallocation. "Microwave" radio frequencies, or systems licensed within the "Microwave Public Safety Pool" (Radio Service Code "MW") shall be exempt from this requirement.

- C. To request channels from Region 18, a complete printed application package with original signatures plus one complete application package copy must be submitted to: Chair, Louisiana Public Safety Planning Advisory Committee, 3773 Harding Blvd. Baton Rouge, LA 70807-5222. Applications will be considered received only at the time the printed original and printed copy is received. The applicant shall submit the application electronically to the CAPRAD database.

Exception to the requirement to submit the application to the CAPRAD database will be made by the Region if applicants have demonstrated a need for 700 MHz channels and cannot access the CAPRAD database.

The application must include:

- an FCC Form 601 or equivalent
- a description of the proposed system
- system implementation schedule
- loading plan
- a justification for the additional spectrum
- an interference prediction map using the current version of TIA/EIA TSB 88 guidelines
- maps showing all interference predicted in the proposed system
- documents indicating agency-funding commitments sufficient to fund the development of the proposed system(s)
- a list of ‘give-back’ channels if applicable.
- the certification required in 3.2 A.
- a statement notifying the Director of the Office of Homeland Security and Emergency Preparedness of the applicable parish(s) of the application.

With the submission of a showing proving, within the technical and administrative requirements of the Plan, that there are not sufficient state controlled frequencies (State License, and applicable interoperability allocations) for use or reuse to build out the State of Louisiana 700 Mhz. system within a particular parish, and that use of the system without infrastructure cost or user fees has been offered to local subscribers belonging to eligible entities with daily operations within that parish, the State of Louisiana shall be eligible to apply for and be licensed for frequencies under this Plan, under the same conditions and requirements applicable to all other eligible entities.

- D. The Region 18 Review Committee will review the application and, if approved, submit it through the CAPRAD database, to the applicant’s preferred FCC-certified frequency coordinator for processing. This process meets the requirements of Rule 90.176 (c).

The CAPRAD database will reflect the approved application and place the channels for the proposed system in “pre-license” status.

- E. Allocation Disputes: An agency may protest a proposed system within 30 calendar days of the original distribution. Protests will only be considered if the allocation does not conform to plan criteria or objecting agency or the Chairperson can show harmful interference is likely based on the information submitted by the agency requesting the new allocation. If an agency with pre-licensed/region approved co-channel or adjacent channel allocations objects to a proposed allocation due to concerns about potential interference, the objecting agency may request field tests be done to confirm or refute interference potential. The completion of these field tests will be required for Regional application approval. Coverage area service/interference contours of the proposed system(s) should meet values designated in Section 6.1 of this

document. Any costs associated with field tests or any other requirement to obtain Region 18 plan approval is the responsibility of the agency submitting application to Region 18.

The parties involved must resolve the allocation dispute and notify the Region Chair within 14 calendar days. If the parties involved cannot resolve the allocation dispute within that timeframe, then a special full Committee meeting will be scheduled to consider and vote on the protest. If approved, the application will be submitted through the CAPRAD database to the applicant's chosen FCC-certified frequency coordinator for processing.

Procedure for Frequency Coordination

3.3 Procedure for Frequency Coordination

Region 18 will adhere to the National Public Safety Telecommunications Council's (NPSTC) 700 MHz General Use channel sort as shown on the CAPRAD database for narrowband General Use channels. In the event that any parish frequency pool becomes inadequate, available channels from the pool(s) of adjoining parish(es) may be assigned if the technical requirements of this Plan and non-interference with other allocations within Region 18 and the adjoining regions can be maintained. Region 18 will participate in the CAPRAD database and keep the Regional Plan and current frequency allotment/allocation information on the database. If at any time a system is allocated channels within Region 18 and the system cannot be developed within the agreed upon guidelines (slow growth), the channels will be returned to the parish pool allotments they originated from and again be available to other agencies.

Allocation of Narrowband "General Use" Spectrum

3.4 Allocation of Narrowband "General Use" Spectrum

Region 18 will ensure that systems allocated 25 KHz channel blocks will utilize all of the channel and not "orphan" any portions of a system designated channel. (See Section 6.3)

Low Power Channels

3.5 Low Power Channels

A. The FCC in the 700 MHz band plan set aside channels 1 - 11 paired with 961 - 971 and 949 - 960 paired with 1909 - 1920 for low power use subject to Commission-approved Regional Planning Committee Regional Plans. Transmitter power must not exceed 2 watts (ERP).

This plan will allow aggregation of two 6.25 KHz channels for 12.5 kHz bandwidth. On scene temporary base and mobile relay stations are allowed (to the extent FCC rules allow) antenna height limit of 6.1 meter (20 feet)

AGL (Above Ground Level). However, users are encouraged to operate in simplex mode with the least practicable amount of power to reliably maintain communications whenever possible. Channels are intended for use in a wide variety of applications that may require digital modulation types as well. The use of EIA/ TIA-102, Project 25 Common Air Interface is required.

Simplex operations may occur on either the base or mobile channels. Users are cautioned to coordinate on scene use among all agencies involved, particularly when the use of repeaterized modes is possible at or in proximity to a common incident. Users should license multiple channels and be prepared to operate on alternate channels at any given operational area.

- B. In the implementation of 700 MHz public safety spectrum throughout Region 18, there may be opportunities for increased channel reuse when developing radio systems for "campus" type operations. Examples of those who may capitalize on this opportunity include hospitals, stadiums, or places of public gathering, public universities, transit systems and ports. These channels do not enjoy the benefits of parishwide channels in that they are not cleared for usage over a wide area. In many instances, facilities require a smaller or more specific geographical coverage area than assumed in the initial channel packing plan and may be able to be reused more efficiently. These "campus" type systems also, in many cases, require in-building or confined space/ tunnel radio coverage or communications along a linear pathway, such as a maintenance or right of way. Public safety channels can be allotted to this type operation in a region and can lead to effective system development, along with increased spectral efficiency, if power levels and Area of Protection (AOP) of the area are taken into account in system planning. These parameters must be established appropriate to the area of coverage. In order to facilitate this effective method of system implementation, channels may be identified in certain areas of Region 18 that may be utilized in a smaller service area. These channels are not eligible to be utilized throughout the parish and the following criteria must be adhered to when requesting channels from Region 18 for operations of this type:

The 50dBu service contour of the proposed system must not exceed an area more than 2 miles from the proposed service area. When this 2-mile distance extends to an adjacent region, the applicant must obtain concurrence from the adjacent region. Reduced external antenna height, along with reduced ERP, directional antennae, distributed antenna systems, radiating "leaky coax," are all tools that should be utilized in the development of these type systems. Region 18 will ensure the development of these types of systems will in no way interfere with co-channel or adjacent channel users within Region 18 or Region 18's adjacent regions. The Chairperson, or a majority of the members of the region, has the authority to request and require engineering studies from the applicant that indicate no harmful interference will be introduced to

any co-channel or adjacent channel existing user prior to application approval. For 25 kHz co-channel assignments, the 50dBu service contour of the proposed stations will be allowed to extend beyond the defined service area for a distance no greater than 2 miles. An adjacent/alternate 25 kHz channel shall be allowed to have its 60 dB μ (50,50) contour touch, but not overlap the 40dB μ service (50,50) contour of an adjacent/alternate system being protected. Evaluations should be made in both directions to ensure compliance. The approval of systems utilizing parish low power channels are subject to approval of the Regional Planning Committee.

Data

3.6 Mobile Data

Spectrum may be assigned for mobile data use in accordance with the FCC regulations in effect at the time the application is received.

Dispute Resolution – Intra-Regional

3.7 Dispute Resolution – Intra-Regional

In the event an agency disputes the implementation of this plan, the agency must notify the Chair of the dispute in writing. This section does not apply to protests over new spectrum allocations. The Chair will attempt to resolve the dispute on an informal basis. If a party to the dispute employs the Chair, then the Vice-Chair will attempt resolution. In such cases, the Chair shall be deemed to have a conflict of interest and will be precluded from voting on such matters. If after 30 days the dispute is not resolved, the Chair (or Vice Chair) will appoint a Dispute Resolution Committee consisting of at least five members from Region 18. That committee will select a Chair to head the committee.

The Regional Plan Chair (or Vice Chair) will represent the Region in presentations to the Dispute Resolution Committee. The Committee will hear input from the disputing agency, any effected agencies, and the Region Chair or Vice-Chair. The Committee will then meet in executive session to prepare a recommendation to resolve the dispute. Should this recommendation not be acceptable to the disputing agency/agencies, the dispute and all written documentation from the dispute will be forwarded to the National Regional Planning Oversight Committee for review. As a last resort, the dispute will be forwarded to the Federal Communications Commission for final resolution.

4. Evaluation

- 4.1 In addition to assuring that every application meets the minimum requirements, each application will be evaluated and prioritized in accordance with a filing window concept in order to provide for evaluation of all applications for the available spectrum within the same time frame.

The application will be reviewed for completeness and compliance with the Plan. If it is not complete and/or does not comply with the Plan, the submitting person will be notified to correct, comply with requirements, provide any additional information required, etc., and to re-submit. Re-submitted applications do not retain their place in the processing line, and when received, will be considered as new applications.

There shall be twelve filing windows per year corresponding to the calendar months. The first filing window shall be the first full calendar month after the date of FCC approval of this Plan. All applications received during the same calendar month shall be evaluated and prioritized together in accordance with the following criteria:

In the event that spectrum allocation requests conflict and cannot all be accommodated, the following matrix will be used to determine priority for allotment. This matrix will only be used if two or more requests are received in the same filing window for the same channels. Otherwise, the first come first served procedure of Section 3.2 will be used.

- Priority is given to users fundamentally involved with the protection of Life and Property (15 points maximum)
- Priority is given to multi-agency systems that promote multi-agency, inter-discipline interoperable communications. These systems can be either a group of separate departments within a large agency or groups of agencies operating together under a large blanket agency, or a combination of both. (25 points maximum)
- Documentation of proposed funding to construct the system using these 700 MHz frequencies must be available and accompany the original spectrum request. (25 points maximum)
- The submission of some form of proof of financial commitment, accompanied by a RFP (Request for Proposal) outlining the design of the proposed system and detailing the development of the requested channels will be required to be submitted to the Regional Planning Committee prior to approval. (35 points maximum)

If there are more applicants than frequencies available for a given area, the above criteria will be used to grade each application. The application scoring the highest number of points will have priority.

Coordination with Adjacent Regions

5.1 Coordination with Adjacent Regions

The regions adjacent to Region 18 are listed below:

Region 4, Arkansas

Region 23, Mississippi

Region 40, Texas (Central & Northeast)

Region 51, Texas – East

Region 18 has coordinated allotments with and received concurrence from all bordering Regions by providing copies of the Region 18 Plan (including channel allotments) to each adjacent Region by emailing a copy of the plan to the adjacent Region's Chairperson.

5.2 Dispute Resolution Inter-Regional

Region 18 has negotiated inter-regional dispute resolution agreements with all four adjacent regions. Appendix H contains the signed Inter-Regional Dispute Resolution Agreements from each adjacent region.

System Design / Efficiency Requirements

Interference Protection

6.1 Interference Protection

The frequency allotment list will be based on an assumption that systems will be engineered on an interference limited basis, not a noise floor limited basis. Agencies are expected to design their systems for maximum signal levels within their coverage area and minimum levels in the coverage area of other co-channel users. Coverage area is normally the geographical boundaries of the agency(s) served plus a three to five mile area beyond.

Systems should be designed for minimum signal strength of 40 dB μ in the system coverage area while minimizing signal power out of the coverage area. TIA/EIA TSB88-B (or latest version) will be used to determine harmful interference assuming 40 dB μ , or greater, signal in all systems coverage areas. This may require patterned antennas and extra sites compared to a design that assumes noise floor limited coverage. Region 18 complies with National Coordination Committee recommendations listed in Appendix K of the Regional Planning Committee Guidelines published by the National Coordination Committee (NCC).

Spectrum Efficiency Standards

6.2 Spectrum Efficiency Standards

Initial allotments will be made on the basis of 25 kHz channels. To maximize spectrum utilization, prudent engineering practices and receivers of the highest quality must be used in all systems. Given a choice of radios to choose from in a given technology family, agencies should use the units with the best specifications. This Plan will not protect agencies from interference if their systems are under-constructed (ie; areas with the established service area having minimum signal strength below 40 dBu), or the systems utilize low quality receivers. The applicants implementation of prudent engineering practices will be encouraged by the Regional Planning Committee at all times.

Region 18 encourages small agencies to partner with other agencies in multi-agency statewide or regional systems as they promote spectrum efficiency and both small and large agency capacity needs can be met. Loading criteria can also be achieved in multi-agency systems that will allow greater throughput for all agencies involved than that which could be achieved individually.

This Plan requires that entities with minimal requirements join together on a single system whenever feasible and that applicants participate cooperatively in larger, more efficient trunked systems whenever their needs can be met by such a system. Accordingly, applicants are encouraged to plan cooperative systems so as to minimize the total number of frequencies needed by all eligible public safety and special emergency entities in the area. Each applicant is required to submit complete justification for the system design and number of channels that they are requesting.

Entities desiring to operate in the 700 MHz public safety spectrum within Region 18 are encouraged to join the Louisiana 700 MHz P25 statewide system, or a regional system that is fully integrated into the Louisiana 700 MHz P25 statewide system (the system of systems concept). In any case, all subscriber units shall be fully interoperable in the Louisiana 700 MHz P25 statewide system in accordance with the State of Louisiana State Tactical Interoperability Communications Plan and the applicable regions' Tactical Interoperability Communications Plan.

The maximum number of channels that may be licensed to an applicant for conventional mode operation is six. Trunking is required for licensees requiring more than six 6.25 kHz; three 12.5 kHz channels; or two 25 kHz channels. Implementation of trunking is important not only to ensure that near-term use is accommodated, but also to provide for growth and to preserve opportunities for other potential users. Exceptions will be considered by the Region 18 Review Committee and then the FCC upon request. Exceptions will be considered by the Region 18 Review Committee only when a substantial showing is made that alternative technology would be at least as efficient as trunking or that trunking will not meet operational requirements. Exceptions will not be granted routinely however, and

convincing evidence why trunking is unacceptable must be presented in support of any request for exception.

6.3 Orphaned Channels

The narrowband pool allotments within Region 18 will have a channel bandwidth of 25 kHz. These 25 kHz allotments have been characterized as technology neutral and flexible enough to accommodate multiple technologies utilizing multiple bandwidths. If agencies choose a technology that requires less than 25 kHz channel bandwidth for their system, there is the potential for residual, orphaned channels of 6.25 kHz or 12.5 kHz bandwidth immediately adjacent to the assigned channel within a given parish area.

An orphaned channel may be used at another location within the parish area where it was originally approved, if it meets co and adjacent channel interference criteria. Region 18 will utilize “parish areas” as guidelines for channel implementation with the area of Region 18. The definition of “parish area” in this plan is the geographical/political boundaries of a given parish, plus a distance of up to 10 miles outside of the parish.

If the channel, or a portion of a channel, is being moved into a “parish area” that is within 30 miles of an adjacent Region, Region 18 will receive concurrence from the affected Region. By extending the “parish area” by a designated distance, it is anticipated this will increase the possibility that orphaned channel remainders will still be able to be utilized within the “parish area”, and reduce the potential for channel remainders to be forced to lay dormant. These movements will be documented on the CAPRAD database.

When in the best interest of public safety communications and efficient spectrum use within the Region, the Region 18 Review Committee shall have the authority to move orphaned channel allotments, and/or co-/adjacent-channel allotments affected by the movement of orphan channels, within its “parish areas”, which are defined above. This is to retain spectrum efficiency and/or minimize co-channel or adjacent channel interference between existing allotments within the Region utilizing disparate bandwidths and technologies.

System Implementation

6.4 System Implementation

All applicants are required to submit a system implementation schedule as a part of their application package.

Implementation of systems will adhere to guidelines in FCC rules. An Agency may file a request with the Regional Chairperson for an extension of time to implement. The request should include all details describing why the agency has not implemented and a new implementation schedule. If necessary, the Regional Chairperson will call a special meeting to determine if

the allotment should be extended or if the agency should reapply to the committee for another allotment.

6.5 Loading

6.5.1 All applicants are required to submit a detailed loading plan as a part of their application package.

6.5.2 Loading Tables Voice Channels

EMERGENCY		NON-EMERGENCY	
CHANNELS	UNITS/CHANNEL	CHANNELS	UNITS/CHANNEL
1 - 5	70	1 - 5	80
6 - 10	75	6 - 10	90
11 - 15	80	11 - 15	105
16 - 20	85	16 - 20	120

Agencies requesting additional frequencies must show loading of 100 percent or greater on their existing system. Should a demand for frequencies exist after assignable frequencies become exhausted, any system having frequencies assigned under this Plan four or more years previously and not loaded to at least seventy percent will lose operating authority on several frequencies to bring the system into compliance with the 70 percent loading standard. Frequencies lost in this manner will be reallocated to other agencies to help satisfy the demand for additional frequencies.

6.5.3 Traffic Loading Study Voice or Data Systems

Justification for adding frequencies, or retaining existing frequencies, may be provided by a traffic loading study instead of loading by number of transmitters per channel. It will be the responsibility of the requesting agency to provide a verifiable study showing sufficient airtime usage to merit additional frequencies. A showing of airtime usage, excluding telephone interconnect air time, during the peak busy hour greater than 70 percent per channel on three consecutive days will be required to satisfy loading criteria.

Interoperability Channels

7. Interoperability Channels

7.1 Introduction

The ability for agencies to effectively respond to mutual aid requests directly depends on their ability to communicate with each other. Louisiana is subject to many natural disasters and contains regions and facilities which may be susceptible to a man-made disaster or weapons of mass destruction attack.

Mutual aid should be encouraged among agencies. This Plan seeks to facilitate the communications necessary for effective mutual aid.

The administration of the 700 MHz interoperability channels is the responsibility of the State of Louisiana Governor’s Office of Homeland Security and Emergency Preparedness (GOHSEP). If at any time both the State and the Region 18 Planning Committee agree to do so, then the Region 18 Planning Committee may assume this role and notify the FCC in writing of the change in administrative duties. See the NCC/NPSTC List of 700 MHz Interoperability Channels in Appendix E.

7.2 Tactical Channels

All mobile and portable units operating under this Plan and utilizing 700 MHz channels must be programmed for the interoperability channels as specified in the State of Louisiana GOHSEP Interoperable Channels and Talkgroups Policy as follows:

All 700 MHz radio subscriber units operating under the Louisiana State license or licensed under the Region 18 Plan are required to have the following 700 MHz. and 800 MHz. talkgroups/channels programmed:

To provide interoperability with public safety units from throughout the State and Nation, all such 700 MHz. subscriber radios shall be equipped to operate on all of the NPSAC 800 MHz conventional mutual aid channels in analog mode as follows:

NATIONWIDE 800 MHz. BAND PUBLIC SAFETY INTEROPERABILITY CHANNELS

DESIGNATOR (POST-REBANDING)	DESIGNATOR (PRE-REBANDING)	USE	MOBILE/PORTABLE TRANSMIT FREQUENCY	MOBILE/PORTABLE RECEIVE FREQUENCY	CTCSS (TONE SQUELCH) FREQUENCY
8CALL90	ICALL	CALLING, ESTABLISHING CONTACT ONLY IN REPEATER NETWORKS	821.0125 MHz.	866.0125 MHz.	156.7 Hz.
8TAC91	ITAC1	TACTICAL REPEATER	821.5125 MHz.	866.5125 MHz.	156.7 Hz.
8TAC92	ITAC2	TACTICAL REPEATER	822.0125 MHz.	867.0125 MHz.	156.7 Hz.
8TAC93	ITAC3	TACTICAL REPEATER	822.5125 MHz.	867.5125 MHz.	156.7 Hz.
8TAC94	ITAC4	TACTICAL REPEATER	823.0125 MHz.	868.0125 MHz.	156.7 Hz.
8CALL90D	ICALLD	CALLING, ESTABLISHING CONTACT ONLY IN SIMPLEX NETWORKS	866.0125 MHz.	866.0125 MHz.	156.7 Hz.
8TAC91D	ITAC1D	TACTICAL SIMPLEX	866.5125 MHz.	866.5125 MHz.	156.7 Hz.
8TAC92D	ITAC2D	TACTICAL SIMPLEX	867.0125 MHz.	867.0125 MHz.	156.7 Hz.
8TAC93D	ITAC3D	TACTICAL SIMPLEX	867.5125 MHz.	867.5125 MHz.	156.7 Hz.
8TAC94D	ITAC4D	TACTICAL SIMPLEX	868.0125 MHz.	868.0125 MHz.	156.7 Hz.

NOTE: POST-REBANDING FREQUENCIES ARE 15 MHz. LOWER THAN THOSE SHOWN.

All such 700 MHz. subscriber radios shall be equipped with the following talkgroups for operation in the statewide P25 700 MHz system:

- *STATE-1
- *STATE-2
- *STATE-3
- *STATE-4
- *INTEROP-1
- *INTEROP-2
- *INTEROP-3
- *INTEROP-4
- *INTEROP-5
- *INTEROP-6
- *INTEROP-7
- *INTEROP-8
- *INTEROP-9
- *INTEROP-10
- *R1-COORDCALL
- *R1-COORDTK-1
- *R1-COORDTK-2
- *R1-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R1-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R2-COORDCALL
- *R2-COORDTK-1
- *R2-COORDTK-2
- *R2-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R2-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R3-COORDCALL
- *R3-COORDTK-1
- *R3-COORDTK-2
- *R3-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R3-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R4-COORDCALL
- *R4-COORDTK-1
- *R4-COORDTK-2
- *R4-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R4-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R5-COORDCALL
- *R5-COORDTK-1
- *R5-COORDTK-2
- *R5-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R5-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R6-COORDCALL
- *R6-COORDTK-1
- *R6-COORDTK-2
- *R6-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R6-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R7-COORDCALL
- *R7-COORDTK-1

- *R7-COORDTK-2
- *R7-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R7-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)
- *R8-COORDCALL
- *R8-COORDTK-1
- *R8-COORDTK-2
- *R8-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R8-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)

- *R9-COORDTK-1
- *R9-COORDTK-2
- *R9-BOLO (LAW ENFORCEMENT RADIOS ONLY)
- *R9-TACTICAL (LAW ENFORCEMENT RADIOS ONLY)

In addition, all such 700 MHz. subscriber radios of agencies based in Region 1 only shall be equipped with the following talkgroups for operation in the statewide P25 700 MHz. system:

- *JEFFERSON – 1
- *JEFFERSON – 2
- *JEFFERSON – 3
- *JEFFERSON – 4
- *ORLEANS – 1
- *ORLEANS – 2
- *ORLEANS – 3
- *ORLEANS – 4
- *PLAQUEMINES – 1
- *PLAQUEMINES – 2
- *PLAQUEMINES – 3
- *PLAQUEMINES – 4
- *ST. BERNARD – 1
- *ST. BERNARD – 2
- *ST. BERNARD – 3
- *ST. BERNARD – 4

Those of agencies based in Region 2 only shall have:

- *ASCENSION – 1
- *ASCENSION – 2
- *ASCENSION – 3
- *ASCENSION – 4
- *EAST BATON ROUGE – 1
- *EAST BATON ROUGE – 2
- *EAST BATON ROUGE – 3
- *EAST BATON ROUGE – 4
- *EAST FELICIANA – 1
- *EAST FELICIANA – 2
- *EAST FELICIANA – 3
- *EAST FELICIANA – 4
- *IBERVILLE – 1
- *IBERVILLE – 2
- *IBERVILLE – 3
- *IBERVILLE – 4

- *LIVINGSTON – 1
- *LIVINGSTON – 2
- *LIVINGSTON – 3
- *LIVINGSTON – 4
- *POINTE COUPEE – 1
- *POINTE COUPEE – 2
- *POINTE COUPEE – 3
- *POINTE COUPEE – 4
- *WEST BATON ROUGE – 1
- *WEST BATON ROUGE – 2
- *WEST BATON ROUGE – 3
- *WEST BATON ROUGE – 4
- *WEST FELICIANA – 1
- *WEST FELICIANA – 2
- *WEST FELICIANA – 3
- *WEST FELICIANA – 4

Those of agencies based in Region 3 only shall have:

- *ASSUMPTION – 1
- *ASSUMPTION – 2
- *ASSUMPTION – 3
- *ASSUMPTION – 4
- *LAFOURCHE – 1
- *LAFOURCHE – 2
- *LAFOURCHE – 3
- *LAFOURCHE – 4
- *ST. CHARLES – 1
- *ST. CHARLES – 2
- *ST. CHARLES – 3
- *ST. CHARLES – 4
- *ST. JAMES – 1
- *ST. JAMES – 2
- *ST. JAMES – 3
- *ST. JAMES – 4
- *ST. JOHN THE BAPTIST – 1
- *ST. JOHN THE BAPTIST – 2
- *ST. JOHN THE BAPTIST – 3
- *ST. JOHN THE BAPTIST – 4
- *TERREBONNE – 1
- *TERREBONNE – 2
- *TERREBONNE – 3
- *TERREBONNE – 4

Those of agencies based in Region 4 only shall have:

- *ACADIA – 1
- *ACADIA – 2
- *ACADIA – 3
- *ACADIA – 4
- *EVANGELINE – 1
- *EVANGELINE – 2
- *EVANGELINE – 3

- *EVANGELINE – 4
- *IBERIA – 1
- *IBERIA – 2
- *IBERIA – 3
- *IBERIA – 4
- *LAFAYETTE – 1
- *LAFAYETTE – 2
- *LAFAYETTE – 3
- *LAFAYETTE – 4
- *ST. LANDRY – 1
- *ST. LANDRY – 2
- *ST. LANDRY – 3
- *ST. LANDRY – 4
- *ST. MARTIN – 1
- *ST. MARTIN – 2
- *ST. MARTIN – 3
- *ST. MARTIN – 4
- *ST. MARY – 1
- *ST. MARY – 2
- *ST. MARY – 3
- *ST. MARY – 4
- *VERMILION – 1
- *VERMILION – 2
- *VERMILION – 3
- *VERMILION - 4

Those of agencies based in Region 5 only shall have:

- *ALLEN – 1
- *ALLEN – 2
- *ALLEN – 3
- *ALLEN – 4
- *BEAUREGARD – 1
- *BEAUREGARD – 2
- *BEAUREGARD – 3
- *BEAUREGARD – 4
- *CALCASIEU – 1
- *CALCASIEU – 2
- *CALCASIEU – 3
- *CALCASIEU – 4
- *CAMERON – 1
- *CAMERON – 2
- *CAMERON – 3
- *CAMERON – 4
- *JEFFERSON DAVIS – 1
- *JEFFERSON DAVIS – 2
- *JEFFERSON DAVIS – 3
- *JEFFERSON DAVIS – 4

Those of agencies based in Region 6 only shall have:

- *AVOYELLES – 1
- *AVOYELLES – 2

- *AVOYELLES – 3
- *AVOYELLES – 4
- *CATAHOULA – 1
- *CATAHOULA – 2
- *CATAHOULA – 3
- *CATAHOULA – 4

Those of agencies based in Region 9 only shall have:

- *ST. HELENA – 1
- *ST. HELENA – 2
- *ST. HELENA – 3
- *ST. HELENA – 4
- *ST. TAMMANY – 1
- *ST. TAMMANY – 2
- *ST. TAMMANY – 3
- *ST. TAMMANY – 4
- *TANGIPAHOA – 1
- *TANGIPAHOA – 2
- *TANGIPAHOA – 3
- *TANGIPAHOA – 4
- *WASHINGTON – 1
- *WASHINGTON – 2
- *WASHINGTON – 3
- *WASHINGTON – 4

FCC rules require that all such 700 MHz subscriber radios shall be capable of being programmed to operate on all of the following channels, and the Region 18 Planning Committee recommends that all such 700 MHz subscriber radios be programmed with the following channels for operation in both the repeater mode and the direct (talkaround) mode using P25 digital modulation with a NAC of \$293. These channels operate outside of any trunked system so they can be used in the direct mode for short range radio to radio communication anywhere, or if the trunked system is down. The common name, not the original NCC name, should be used:

FREQ / FCC (SUBSCRIBER LOAD)		BASE, MOBILE, OR FIXED (REPEATER OR CONTROL)	ELIGIBILITY / PRIMARY USE	ORIGINAL NCC NAME	COMMON NAME
RECEIVE	TRANSMIT				
CHANNEL	CHANNEL	FCC 700 MHz Public Safety Band (12.5 kHz Channels)

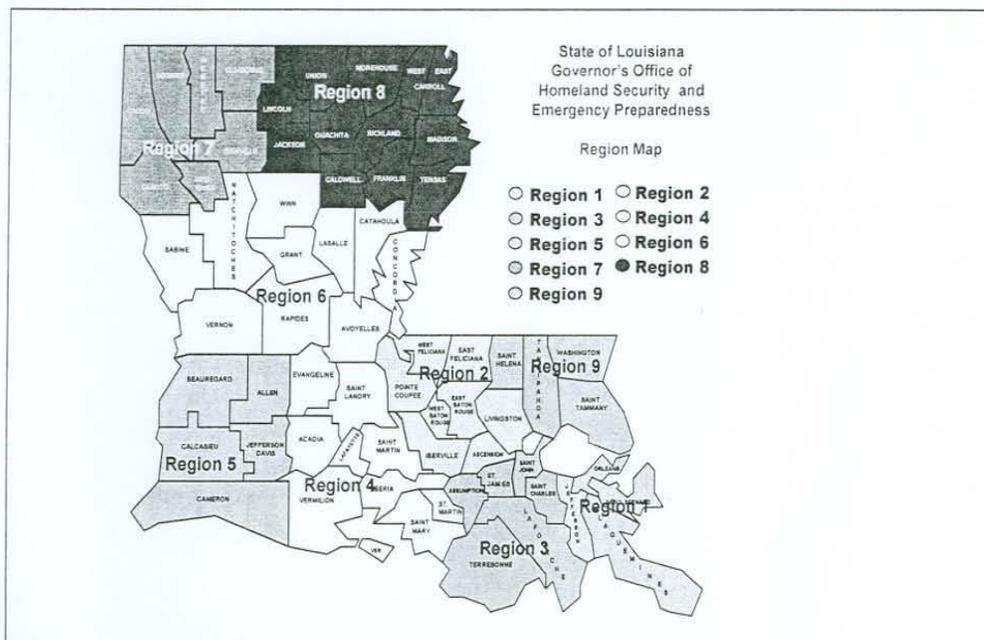

Figure 2.1.2-1: State of Louisiana Homeland Security Regions

The following table provides a list of the regions within the state and lists the jurisdictions included in each region:

Region 1	Region 2	Region 3
<ul style="list-style-type: none"> • Jefferson Parish • Orleans Parish • Plaquemines Parish • Saint Bernard Parish 	<ul style="list-style-type: none"> • Ascension Parish • East Baton Rouge Parish • West Baton Rouge Parish • East Feliciana Parish • West Feliciana Parish • Iberville Parish • Livingston Parish • Point Coupee Parish 	<ul style="list-style-type: none"> • Assumption Parish • Lafourche Parish • Saint Charles Parish • Saint James Parish • Saint John Parish • Terrebonne Parish

Region 4	Region 5	Region 6
<ul style="list-style-type: none"> • Acadia Parish • Evangeline Parish • Iberia Parish • Lafayette Parish • Saint Landry Parish • Saint Martin Parish • Saint Mary Parish • Vermillion Parish 	<ul style="list-style-type: none"> • Allen Parish • Beauregard Parish • Calcasieu Parish • Cameron Parish • Jefferson Davis Parish 	<ul style="list-style-type: none"> • Avoyelles Parish • Catahoula Parish • Concordia Parish • Grant Parish • LaSalle Parish • Natchitoches Parish • Rapides Parish • Sabine Parish • Vernon Parish • Winn Parish
Region 7	Region 8	Region 9
<ul style="list-style-type: none"> • Bienville Parish • Bossier Parish • Caddo Parish • Claiborne Parish • Desoto Parish • Red River Parish • Webster Parish 	<ul style="list-style-type: none"> • Caldwell Parish • East Carroll Parish • West Carroll Parish • Franklin Parish • Jackson Parish • Lincoln Parish • Madison Parish • Morehouse Parish • Ouachita Parish • Richland Parish • Tensas Parish • Union Parish 	<ul style="list-style-type: none"> • Saint Helena Parish • Saint Tammany Parish • Tangipahoa Parish • Washington Parish

Table 2.1.2: Regions/Jurisdictions

7.3 Deployable Systems

In this Plan, Region 18 strongly supports use of deployable systems, both conventional and trunked. Deployable systems are prepackaged systems that can deploy by ground or air to an incident to provide additional coverage and capacity on designated 700 MHz interoperability channels and/or agency specific channels. This will minimize the expense of installing extensive fixed infrastructure in areas while still providing mission critical functionalities as the Region recognizes the difficulty of providing complete coverage in all areas due to financial, demographic and geographical constraints.

Agencies should have conventional deployable systems capable of being tuned to any of the GOHSEP designated/NCC recommended interoperability tactical channels. Those agencies that are part of a multi-agency trunked system and commonly provide mutual aid to each other are encouraged to have trunked deployable systems that operate on the tactical talkgroups designated by GOHSEP for this use. GOHSEP will develop the operational details for deploying these systems.

7.4 Monitoring of Calling Channels

700 MHz licensees will be responsible for monitoring interoperable calling channels. GOHSEP may develop operational guidelines for this function.

7.5 Incident Command System Standard

Region 18 supports the NCC recommendations regarding the National Incident Management System (NIMS) and Incident Command System (ICS).

8. Future Planning

8.1 Database Maintenance

The CAPRAD pre-coordination database has developed channel allotments in each parish area within Louisiana using criteria such as current population, census data, height above average terrain (HAAT) and public safety use curves to provide spectrally efficient frequency allotments. Region 18 will continue to use the CAPRAD database.

8.2 Inter-Regional Dispute Resolution Process

In the event that a dispute arises between Region 18 and an adjacent region or regions regarding spectrum allocations or implementation which cannot be resolved within 60 days, the parties to the dispute will request a hearing by the National Plan Oversight Committee. (see Appendix H).

8.3 Amendment Process

Amendments to the Region 18 Plan will be made at Region 18 meetings. All amendments will be voted on and passed or rejected by a simple majority vote. The Chair or his designee will make the appropriate changes to the Plan and notify the adjacent regions for their concurrence. Following the adjacent Regions concurrence process, the Plan amendments will be filed by the Chair with the FCC for approval.

8.4 Meeting Announcements

Announcements of meetings of the Region 18 Planning Committee will be made per the Region 18 bylaws. Region 18 will utilize public notices issued by the FCC, email to all members, verbal announcements at meetings and/or appropriate publications.

Certification

I hereby certify that all Region 18 Planning Committee meetings, including subcommittee or executive committee meetings were open to the public.

William R. Vincent, Sr, Chair (Inception till 2009)

Kenneth Hughes (2009 - March 27, 2013)

Paul L. Miller (March 27, 2013 – July 15, 2015)

Michael W. Musselman (July 16, 2015 – present)
Region 18

Appendix I	Channel Numbers and Channel Center Frequencies Narrowband Segments of the 769-775 MHz and 799-805 MHz Bands

APPENDIX A

THE BYLAWS OF THE REGION 18 700 MHz REGIONAL PLANNING COMMITTEE

NAME & PURPOSE

- 1.1 Name and purpose. The name of this Region shall be the Region 18 700 Mhz Regional Planning Committee. Its primary purpose is to foster cooperation, planning, development of regional plans and the implementation of these plans in the 700 MHz Public Safety Band.

MEMBERS

For purposes of this Article, the term “member”, unless otherwise specified, refers to both voting and non-voting members.

- 2.1 Number, Election and Qualification. The Regional Committee shall have two classes of members, “voting members” and “non-voting members.” New members may be added at annual, special, or regular meetings.

Voting members. Voting members shall consist of one representative from any single agency engaged in public safety which is eligible to hold a license under 47 CFR 90.523 or 47 CFR 2.103 except that a single agency shall be allowed no more than one vote for each distinct eligibility category within the agency’s organization or political jurisdiction. In voting on any issue, the individual must identify himself/herself and the agency and eligibility category which he or she represents. Voting members may not vote on issues involving their entity or in which they have a commercial interest.

Non-Voting members. Non-voting members are all others interested in furthering the goals of public safety communications

- 2.2 Tenure. In general, each member shall hold membership from the date of acceptance until resignation or removal.
- 2.3 Powers and Rights. In addition to such powers and rights as are vested in them by law, or these bylaws, the members shall have such other powers and rights as the membership may determine.
- 2.4 Suspension and Removal. A member may be suspended or removed with cause by vote of a majority of members after reasonable notice and opportunity to be heard.
- 2.5 Resignation. A member may resign by delivering written notice to the Chairman of the Regional Committee or to a meeting of the members.
- 2.6 Meetings. Meetings of the members may be held at any time and at any place within Region 18 and/or by meetings teleconference (audio and/or video).

Meetings of the members may be called by the Chairman or by the Vice-Chairman, or in case of death, absence, incapacity, by any other officer or, upon written application of two or more members.

2.7 Call and Notice.

A. Meetings. Reasonable notice of the time and place of meetings of the members shall be given to each member. Such notice need not specify the purposes of a meeting, unless otherwise required by law or these bylaws or unless there is to be considered at the meeting (i) amendments to these bylaws, or (ii) removal or suspension of a member who is an officer.

B. Reasonable and sufficient notice. Except as otherwise expressly provided, it shall be reasonable and sufficient notice to a member to send notice by mail at least five days, or by e-mail/facsimile at least three days before the meeting, addressed to such member at his or her usual last known business address, or, to give notice to such member in person or by telephone at least three days before the meeting.

2.9 Quorum. At any meeting of the members, at least one (1) of the officers elected and a minimum of at least three (3) voting members shall constitute a quorum. Any meeting may be adjourned to such date or dates not more than ninety days after the first session of the meeting by a majority of the votes cast upon the question, whether or not a quorum is present, and the meeting may be held as adjourned without further notice.

2.10 Action by Vote. Each voting member, representing a particular agency (one vote per agency) shall have one vote; non-voting members have no right to vote. When a quorum is present at any meeting, a majority of the votes properly cast by voting members present shall decide any question, including election to any office, unless otherwise provided by law or these bylaws.

2.11 Action by Writing. Any action required or permitted to be taken at any meeting of the members may be taken without a meeting if all members entitled to vote on the matter consent to the action in writing and the written consents are filed with the records of the meetings of the members. Such consents shall be treated for all purposes as a vote at a meeting.

2.12 Proxies. Voting members may vote either in person or by written proxy dated not more than one month before the meeting named therein, which proxies shall be filed before being noted with the Secretary or other person responsible for recording the proceedings of the meeting. Unless otherwise specifically limited by their terms, such proxies shall entitle the holders thereof to vote at any adjournment of the meeting. The proxy shall terminate after the final adjournment of such meeting.

OFFICERS AND AGENTS

3.1 Number and qualification. The officers of the Regional Committee shall be a Chairman, and may include a Vice Chairman, a Treasurer, and a Secretary if any, as

the voting members may determine. All officers must be voting members of the Regional Committee.

- 3.2 Election. The officers shall be elected by the voting members at the first meeting and, thereafter, at any meeting of the members.
- 3.3 Tenure. The officers shall hold office for a term of two years, or in each case until he or she sooner dies, resigns, is removed, or becomes disqualified.
- 3.4 Chairman and Vice-Chairman. The Chairman shall be the chief executive officer of the Regional Committee and, subject to the control of the voting members, shall have general charge and supervision of the affairs of the Regional Committee including the authority to represent the Regional Committee by approving, disapproving, and otherwise acting upon any business of the Regional Committee. The Chairman shall preside at all meetings of the Regional Committee. The Chairman may define standing or ad hoc committees to conduct Region business as needed.

The Vice-Chairman, if any, shall have such duties and powers as the voting members shall determine. The Vice-Chairman shall have and may exercise all the powers and the duties of the Chairman during the absence of the Chairman or in the event of his or her inability to act.

- 3.5 Treasurer. The Treasurer, if any, shall be the chief financial officer and the chief accounting officer of the Regional Committee. The Treasurer shall be in charge of its financial affairs, funds, and valuable papers and shall keep full and accurate records thereof.
- 3.6 Secretary. The Secretary, if any, shall record and maintain records of all proceedings of the members in a file or series of files kept for that purpose, which file or files shall be kept within the Region and shall be open at all reasonable times to the inspection of any member. Such file or files shall also contain records of all meetings and the original, or attested copies, of bylaws and names of all members and the address (including e-mail addresses, if available) of each. If the Secretary is absent from any meeting of members, a temporary secretary chosen at the meeting shall exercise the duties of the Secretary at the meeting.
- 3.7 Suspension or Removal. An officer may be suspended with cause by vote of a majority of the voting members.
- 3.8 Resignation. An officer may resign by delivering written notice to the Chairman, Vice-Chairman, Treasurer, or Secretary of the Regional Committee, or to a meeting of the members. Such resignation shall be effective upon receipt (unless specified to be effective at some other time), and acceptance thereof shall not be necessary to make it effective unless it so states.
- 3.9 Vacancies. If the office of any officer becomes vacant, the voting members may elect a successor. Each such successor shall hold office until his or her successor is

elected and qualified, or in each case until he or she sooner dies, resigns, is removed, or become disqualified

AMENDMENTS

- 4.1 These bylaws may be altered, amended or replaced in whole or in part by vote. The voting members may by a two-thirds vote, alter, amend, or repeal any bylaws adopted by the Regional Committee members.

DISSOLUTION

- 5.1 This Regional Committee may be dissolved by the consent of two-thirds plus one of the members in good standing at a special meeting called for such purpose. The FCC shall be notified.

RULES OF PROCEDURES

- 6.1 The Conduct of Regional Meetings including debate and voting shall be governed by *Simple Parliamentary Procedure*, Martha Nall, published by the University of Kentucky, College of Agriculture, Cooperative Extension Service, Publication #IP-15, Copyright 2000.

Meeting Notices:

August 31, 2001 – New Orleans, LA

PUBLIC NOTICE

LOUISIANA PUBLIC SAFETY PLANNING COMMITTEE (REGION 18) ANNOUNCES FIRST MEETING

In accordance with provisions contained in The Development of Operational, Technical and Spectrum Requirements for Meeting Federal, State and Local Public Safety Agency Communications Requirements for Priority Access Service, *First Report and Order* and *Third Notice of Proposed Rulemaking*, WT Docket No. 96-86, 14 FCC Rcd 152, 190 ¶ 77, the FCC has adopted a regional planning approach to spectrum management for specific channels through-out the 700 MHz band.

By this notice, the Region 18 (Louisiana) 700 MHz Public Safety Planning Committee announces that its first meeting will be held on August 31, 2001 at 10:00 a.m. at the New Orleans Marriott Hotel, Galerie 1, 555 Canal Street, New Orleans, Louisiana. The purpose of the meeting is to begin the formation of a coordinated regional plan for Region 18, Louisiana.

All parties having Public Safety interests within Region 18 are encouraged to attend. For further information, please contact:

PUBLIC SAFETY PLANNING COMMITTEE
ANNOUNCES NEXT MEETING**

The Region 18 (Louisiana) 700 MHz Public Safety Planning Committee announces that its next meeting will be held on January 14, 2004 at 10:30 a.m. at the Louisiana State Police Training Academy, Building A, 7901 Independence Boulevard, Baton Rouge, Louisiana.

The agenda for this meeting will include sub-committee planning time for the newly formed 4.9 GHz band, Implementation, Technical, and Interoperability sub-committees.

The Region 18 (Louisiana) 700 MHz Public Safety Planning Committee is open to the public. All eligible public safety providers whose sole purpose or principal purpose is to protect the safety of life, health, or property in Region 18 would utilize these frequencies. It is essential that not only public safety, but all government, Native American Tribal, and non-governmental organizations eligible under Section 90.523 of the Commission's Rules be represented in order to ensure that each agency's future spectrum needs are considered in the allocation process. Administrators who are not oriented in the communications field should delegate someone with this knowledge to attend, participate and represent your agency's needs.

All interested parties wishing to participate in the planning for the use of new public safety spectrum in the 700 MHz band, or the newly allocated 4.9 GHz band within Region 18 are encouraged to attend. For further information, please contact:

REGION 18 (LOUISIANA) REGIONAL PLANNING COMMITTEE
TO HOLD 700 MHZ MEETING**

WT Docket 02-378

The Region 18 (Louisiana) 700 MHz Regional Planning Committee (Region 18 700 MHz RPC) will hold a meeting on Thursday, July 13, 2017. Beginning at 1:00 p.m., the Region 18 700 MHz RPC will convene at the Sno's Seafood and Steakhouse, 13131 Airline Hwy., Gonzales, Louisiana 70737.

The purpose of the meeting will be to elect officers for the next two years. The Region 18 700 MHz RPC meeting is in conjunction with the quarterly meeting of the Louisiana Chapters of the Association of Public-Safety Communications Officials-International, Inc., and the National Emergency Number Association.

The Region 18 700 MHz RPC meeting is open to the public. All eligible public safety providers whose sole or principal purpose is to protect the safety of life, health, or property in Region 18 may utilize these frequencies.

It is essential that public safety agencies in all areas of government, including state, municipality, county, and Native American Tribal, and nongovernmental organizations eligible under Section 90.523 of the Commission's rules, 47 CFR § 90.523, be represented in order to ensure that each agency's future spectrum needs are considered. Administrators who are not oriented in the communications field should delegate someone with this knowledge to attend, participate, and represent their agency's needs.

All interested parties wishing to participate in planning for the use of public safety spectrum in the 700 MHz band within Region 18 should plan to attend. For further information, please contact:

Michael W. Musselman, Chairperson
Region 18 700 MHz Public Safety Regional Planning Committee

-FCC-

Region 18 Meeting Proceedings:

August 31, 2001 – New Orleans, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
AUGUST 31, 2001
NEW ORLEANS, LOUISIANA

The Convenor, William Vincent called the meeting to order at 10:00 a.m. at the New Orleans Marriott Hotel and welcomed all attendees.

Mr. Vincent gave a briefing on the applicable FCC orders and the procedures applicable to 700 MHz. regional planning.

Following discussion by unanimous agreement, William Vincent was elected as Chair, and Michael Sigur was elected Vice Chair of the Region 18 700 MHz. Planning Committee.

It was discussed and agreed that time was needed to get additional guidance on the requirements of the Plan, and that it would be desirable to wait for a FCC accepted plan from another region to use as a model before doing detail work. Therefore, it was agreed that the Chair would monitor the situation accordingly and that actual plan drafting would not occur until then.

There being no further business, the meeting was adjourned.

May 15, 2002 – Covington, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
MAY 15, 2002
COVINGTON, LOUISIANA

Region 18 Planning Committee Chair, William Vincent called the meeting to order at 10:00 a.m. at the Marriott Courtyard in Covington.

Mr. Vincent then introduced representatives of M/A Com who then gave a presentation on the 700 MHz band equipment and systems being planned by M/A-Com.

Since, this meeting was called solely for this presentation, no business was conducted. The meeting was adjourned following the presentation.

January 14, 2004 – Baton Rouge, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
JANUARY 14, 2004
BATON ROUGE, LOUISIANA

Chair William Vincent called the meeting to order at 10:30 a.m. at the Louisiana State Police Training Academy in Baton Rouge.

Mr. Vincent gave an update on the status of the 700 regional plans in other regions.

This was followed by a discussion of the newly formed 4.9 GHz. and the role of the RPC in this band.

Discussion was held on the best process for actual drafting of the plan, and whether to have various sub committees write different sections.

It was agreed that the desired procedure was for the Chair to write drafts which would be updated and reviewed by the full membership.

There being no further business, the meeting was adjourned.

March 18, 2004 – Baton Rouge, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
MARCH 18, 2004
BATON ROUGE, LOUISIANA

Chair William Vincent called the meeting to order at 10:30 a.m. at the Louisiana State Police Training Academy in Baton Rouge.

There was detailed discussion of the planning elements and input was received on issues related to development of the 700 Plan.

It was agreed that plan language drafting should not be done until the process was further along nationwide and that we had several FCC accepted plans to use as models.

There being no further business, the meeting was adjourned.

April 27, 2006 – Baton Rouge, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
APRIL 27, 2006
BATON ROUGE, LOUISIANA

At 10:40 a.m., the meeting was called to order by William Vincent, Chair.

The Chair welcomed all attendees and gave an overview presentation of the 700 MHz spectrum allocation, a brief history of the activities of the Region 18 RPC to date, and briefed the attendees regarding CAPRAD.

The Chair then introduced Bette Rinehart with Motorola who gave a power point presentation of the current state of 700 MHz regional planning requirements and activities.

20 copies of the first draft (04/27/06) of the plan were handed out to those in attendance. The Chair went through and pointed out the various sections of the draft and everyone was asked to look at the first draft and either send any comments to the chair via email, and/or bring them up at the next meeting.

Ken Hughes with the Jefferson Parish Sheriff's Office brought up the question of how those agencies that have 700 MHz STA's will be handled. The Chair replied that there was nothing in the first draft regarding this issue.

Mike Musselman then briefed the attendees on the yahoo web page that he had set up that can be used by the Committee – usage to be determined.

There being no further business, the meeting was adjourned.

January 17, 2007 – Many, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
JANUARY 17, 2007
MANY, LOUISIANA

The meeting was called to order by William Vincent, Chair.

The Chair welcomed all attendees and gave an overview of the activities of the Region 18 Planning Committee and the background of the formation of this committee. The Chair also discussed the purpose of the Region 18 700 Plan.

The Chair briefed the attendees on the ICALL/ITAC Mutual Aid Interoperable System in the State of Louisiana. The Chair stated that during Hurricane Katrina this was one of the only public safety communications systems up and running in the Metro New Orleans/Jefferson area for a time that provided interoperability to the first responders on some level.

The Chair discussed the 700 MHz spectrum. He stated that putting together a 700 MHz regional plan is the purpose of today's meeting. This meeting is a part of due diligence of the public/peer input that is required in order to write this plan.

Copies of the 01/17/07 draft of the Region 18 700 Plan were handed out to those in attendance. Discussion followed regarding the changes made in this draft versus the previous draft.

The Chair stated that he did receive some feedback on the first draft of the Region 18 700 plan. Since the first draft, a reverse frequency listing has been added thanks to Tom Davidson. There was some other input on some of the background administrative information that has been incorporated. The Chair informed the attendees that he and Mike Musselman are continuing to work on this plan. A few 700 plans from other states have now been accepted by the FCC so they now have other plans to refer to as a guideline.

The Chair discussed the Access Spectrum proposal, broadband capability, due diligence items that need to be done in order to be able to file the 700 plan with the FCC and 700 STA's.

The Chair concluded his presentation of the 700 MHz Region 18 Plan. He asked that if anyone had any input or wanted to help with the plan to get in touch with him. The Chair informed the attendees that the FCC deadline to file this plan is February of 2009.

The Chair turned the meeting over to Mike Murphy to report on Louisiana SIEC 700 MHz trunked system.

Mr. Murphy discussed the SIEC and funding of the 700 system. He informed the attendees that 352 million dollars is the estimate as of today to do the entire state infrastructure and subscriber units. This dollar amount will probably go up in time. Mr.

Murphy continued to discuss the status and goals of the 700 MHz system and the activities of the SIEC. He invited all attendees to attend and participate in the SIEC meetings.

A general discussion of funding of the 700 system was held.

There being no further business, the meeting was adjourned.

July 25, 2007 – Monroe, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
JULY 25, 2007
MONROE, LOUISIANA

Meeting Called to Order at 09:02 by Bill Vincent, Chairman of the Region 18 700 MHz Public Safety Planning Committee. He invited those members in attendance to pick up a copy of the Region 18 700 MHz Plan, in its' current form, which were placed on the front table in the meeting room. He advised that he did not have enough copies for everyone present due to the size of the plan documents, and requested that people share. If an electronic copy of the draft plan is desired, send an e-mail to Bill at eoc@lafayettegov.net, and an electronic copy to you.

A second document on the table was a copy of an e-mail from Bill to the State of Louisiana SIEC Staff, notifying them that the official names of our 'mutual- aid / interoperability' channels are changing, in accordance with the new national standards. Bill requested assistance from the SIEC in educating all of the 700 & 800 MHz users of the new channel names. Years ago, the National Coordinating Committee (NCC) made the name changing recommendations to the FCC, but no action was taken. Recently, the National Public Safety Telecommunications Council (NPSTC) reinstated this push to rename the interoperability channels. This new channel naming plan would work nationwide, across all bands, in all radios.

Since all agencies have to deal with rebanding (in 800 MHz), Bill suggested that the renaming of the mutual aid / interoperability channels take place when each radio has to be touched for rebanding. A question was posed from Martha Carter (paraphrased): "Has this been officially pronounced by the FCC"? Bill advised that the FCC was not going to have "channel naming" as part of the rules. He stated that it was being left up to the public safety community on how to name these channels. NPSTC has made a recommendation to the community & FCC of what they would like for the mutual aid / interoperability channels to be called.

A third document on the table listed all of the different mutual aid channels, including VCALL, VTAC, UCALL, UTAC, etc. All of these channels are being renamed as well.

Members of the 700 MHz SIEC who are present this morning are asked to make sure that all 700 MHz radios are being issued with the 800 MHz mutual aid / interoperability channels programmed in them as well.

A brief overview of the 700 plan as envisioned by the FCC consisted of three blocks: The state license block (SIEC), the interoperability block (also under the control of the state), and the third block is the "General" block, which is under the control of this RPC (Regional Planning Committee). The FCC requires that a "Plan" be completed by each RPC, which must then be approved by the FCC before any frequencies listed in the plan can be utilized.

Numerous guidelines and requirements are the responsibility of each RPC to complete. This is not informal. Plenty of advance notice of each meeting (required), along with lots of public input are encouraged. Outreach to all small minority groups such as Indian tribes are required.

The copies of the draft plan presented today include all changes and/or additions that have been made since the last meeting in January of this year. Some of the changes made were to include a set of bylaws. The interoperability section has been cleaned up. None of the technical parameters already in the plan have been changed. A listing of the channels assigned by parish is shown as well as a listing of each frequency and which parishes are assigned to it.

There are not enough channels available in the state license to completely build out the state system, which will likely include many local agencies. Additional frequencies for the state license will have to come from the Region 18 RPC under certain rules and conditions (to be determined).

Discussion: Smaller villages, towns, cities, etc. may likely be asked to join the state system unless they would be a part of a larger local system with many channels already in use (spectrum efficiency).

Bill asked for a sub-committee to come up with draft language (by the next meeting) for when the State can use Region 18 frequencies to fulfill its operational needs. Kenneth Hughes agreed to be on the sub-committee. Somebody from Louisiana State Police needs to be on the sub-committee.

The floor was opened up for discussion and questions. The question of “frequency give backs” was discussed.

Bill advised that he believes we are about 70% complete with the Plan. His goal is to have the Plan at the FCC by early 2008 (one year ahead of schedule). The next meeting will be in the New Orleans area. All people attending this meeting will be notified of the next meeting via e-mail.

Bette Reinhart advised that before the Plan can be submitted to the FCC, it must go to all of the adjacent regions for their approval, which may or may not take a lot of time, depending on how active these regions are. An “Inter-Regional Resolution Dispute Agreement” must also be completed between the regions. She advised that once the plan goes to the Commission, it is reviewed for its completeness and accuracy. If everything is in order, then the plan is placed on a “Public Notice” for 30 days for comments, followed by a 15 day period for reply comments.

The question was asked to try and expedite some of these RPC meetings. Bill advised this was okay, but there must be at least a 45 day notice before each meeting per the FCC. He asked that we get the plan right and not try to hurry it through. Concern was expressed about the continuing use of STA’s for the existing systems.

A motion was made by Ken Hughes that public notices be sent out for meetings for the next several months (September, October, November,), so that we could get to a final plan. Seconded by Bobbie Messer. Motion carried.

The next meeting is to be held at the Kenner Police Department, 500 Veterans Blvd, Kenner, Louisiana. Date and Time to be announced.

The meeting concluded at 10:03.

September 19, 2007 – Kenner, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
SEPTEMBER 19, 2007
KENNER, LOUISIANA

The meeting was called to order by William Vincent, Chair.

The Chair called upon Bette Reinhart for a briefing on the FCC's Second Report & Order recently released, and its impact on existing 700 MHz. systems within Louisiana, and on the preparation of the Region 18 Plan.

The following is a summary of her report:

The FCC released the text of its "Second Report & Order" detailing its decisions impacting the Upper and Lower 700 MHz bands in early August. This "Communicator" will provide a detailed summary of the decisions impacting Public Safety regional planning and deployment in the 700 MHz bands.

The main elements of the FCC's decision include:

- The bottom portion (5+5 MHz) of the band (763-768/793-798 MHz) has been re-designated as broadband spectrum
 - Located adjacent to the Upper 700 MHz D Block CMRS License to accommodate a nationwide, interoperable broadband communications network
 - The public safety broadband spectrum will be licensed to a single public safety entity (the Public Safety Broadband Licensee) under a nationwide authorization
- A reconfiguration of the public safety allocation to consolidate the narrowband spectrum (6+6 MHz) and relocate it to 769-775/799-805 MHz
- The Upper 700 MHz CMRS D Block Licensee must pay the relocation costs of incumbent 700 MHz narrowband licensees
 - Reimbursement applies only to that equipment which is deployed as of August 30, 2007
- Deployment under the old band plan is not permitted after August 30, 2007
 - Licensees **who are in the midst of a system deployment under the old band plan that will require longer than August 30, 2007** must file a Request for Waiver to continue fielding equipment under the old band plan
 - This is the process to follow:
 - As soon as possible, send a brief email to Dana Shaffer, Deputy Bureau Chief of the PSHSB (dana.shaffer@fcc.gov) and Jeff Cohen, Senior Legal Counsel of the PSHSB (jeff.cohen@fcc.gov), with a copy to Derek Poarch (derek.poarch@fcc.gov).
 - The email should explain that you are in the midst of implementing a 700 MHz narrowband system, why you need to complete the build out on the original channel plan without interruption, and that

you plan to file a Petition for Waiver of the August 30, 2007 deadline.

- The email must include particulars about the system and where it is in the deployment process.
 - How many sites and/or base stations, mobiles and portables and vehicular repeaters have been deployed by 8/30/07
 - How many are left to deploy
 - The timeframe for the remaining deployment
 - How many radios have been programmed on specific 700 MHz original plan frequencies but not yet deployed into the field
- Follow up the email with a phone call to Dana Shaffer (202-418-0832) this week. After 9/3/07, call Jeff Cohen (202-418-0799) to discuss the situation and explain the impact of having to stop deployment if a waiver is not granted, why the system must continue deployment without interruption and solicit Dana/Jeff's support for the waiver.
- Complete and file a Petition for Waiver of the August 30, 2007 deadline, detailing the system buildout, the need to continue buildout without interruption, etc. In the waiver request use the information included in the "heads up" email as well as any other information that the FCC may have asked for during the follow up phone call. Any information included in a waiver becomes public once it's filed so don't include any confidential information.
 - File the waiver electronically (convert the document to PDF format before filing) <http://www.fcc.gov/cgb/ecfs/>
 - Email a copy of the waiver to Derek Poarch, Dana Shaffer and Jeff Cohen (email addresses given above)
- If you've already filed a waiver of the August 30, 2007 deadline, contact Dana Shaffer or Jeff Cohen to let them know that a waiver is pending and ask that it be given expedited review
- An internal guard band (768-769/798-799 MHz) has been established to minimize interference between broadband and narrowband public safety operations
- The D Block Licensee and the Public Safety Broadband Licensee must negotiate a Network Sharing Agreement (NSA) detailing the technical specifications of the network and the obligations of each party.
- The D Block licensee must meet the following benchmarks beginning on February 17, 2009:
 - 1) By the end of the 4th year (2/17/2013) provide signal coverage and offer service to at least 75% of the population of the D Block license area
 - 2) By the end of the 7th year (2/17/2016) provide signal coverage and offer service to at least 95% of the population of the D Block license area
 - 3) By the end of the 10th (2/17/2019) year provide signal coverage and offer service to at least 99.3% of the population of the D Block license area
- No public safety entity will be required to use the public safety broadband network

- Local broadband operations outside the PSBL network are permitted under certain limited circumstances
- Wideband operations will be permitted only under a waiver

Important Dates

- August 24, 2007** 2nd Report & Order published in Federal Register
- August 30, 2007** Deployment under the original 700 MHz band plan prohibited
Deployment under the new band plan OK
Any equipment deployed as of this date eligible for reimbursement of relocation costs
- September 10, 2007** FCC must release a Public Notice soliciting applications for the Public Safety Broadband Licensee
- October 23, 2007** Incumbent 700 MHz licensees must provide FCC with a certification related to the amount of equipment operating on 764-766/794-796 MHz and 776/806 MHz
Effective date of new rules
- November 23, 2007** All granted and pending 700 MHz Regional Plans must be amended to comply with the new rules
- January 28, 2008** Upper 700 MHz Auction (includes D Block License)
- February 17, 2009** 700 MHz narrowband relocation complete

Narrowband Consolidation Issues

- Narrowband allocation has been consolidated in the upper 1 MHz of TV Channel 63/68 and the lower 5 MHz of TV Channels 64/69 (769-795 MHz/799-805 MHz)
 - Provides a contiguous 5+5 MHz spectrum block at the bottom of the public safety allocation directly adjacent to the Upper 700 MHz D Block Licensee facilitating deployment of a nationwide broadband network to be shared by Commercial users and public safety
 - Separates narrowband operations from broadband operations to limit the potential for interference
 - Limits the required number of internal guard bands
- Incumbent public safety systems operating under the old band plan on frequencies that have been re-designated for broadband use (764-766/794-796 MHz) must re-tune their equipment to comply with the new band plan
- 700 MHz narrowband re-tuning must be completed by February 17, 2009
 - Coincides with DTV transition deadline
 - D Block Licensee and Public Safety Broadband Licensee can devote energies towards deployment of the broadband network on unencumbered spectrum
- Upper 700 MHz D Block CMRS licensee must pay for incumbent narrowband public safety relocation to comply with new band plan
- All public safety equipment in operation as of August 30, 2007 is eligible for reimbursement
- October 23, 2007 – incumbent public safety agencies must provide the following information to the FCC in the form of a certification, signed by an authorized party:
 - Number of narrowband mobiles and portables in operation as of August 30, 2007 on Channels 63/68 and the upper 1 MHz of 64/69
 - Area of operation of the mobiles/portables
 - Total number of base stations in operation as of August 30, 2007 serving these handsets
 - Location (latitude/longitude) of the base stations
 - Contact information for each set of mobiles/portables/base stations identified
 - Certification must state that the information is ‘true, complete, correct, and made in good faith.’
- FCC will release a Public Notice giving further details on the required deployment certification
- Failure to file the certification results in a forfeiture of all rights to relocation reimbursement costs
- D Block Licensee not required to pay for changes to CAPRAD database or costs incurred by the Regions to modify their Plans to comply with the new band plan
- Equipment placed in operation as of August 31, 2007 must comply with the new band plan
 - No further deployment under the old narrowband channel plan except under a waiver
- A \$10M cap has been placed on relocation costs
 - Cap will not be adjusted upward for “any purpose”

- Costs may be lower
- D Block Winning Bidder, Public Safety Broadband Licensee and the relevant equipment manufacturers will review the deployment certifications filed by the incumbent narrowband licensees and if all agree that the relocation costs will be lower than \$10M, they must report the new figure to the FCC. The D Block Winning Bidder, the Public Safety Broadband Licensee and the relevant equipment manufacturers must all certify that they will be bound to the costs identified
- The D Block winning bidder and the Public Safety Broadband Licensee must submit a narrowband relocation plan to the FCC within 30 days of the NSA Negotiation Commencement Date
 - Plan must address the process to be followed, include a detailed schedule and specify the total costs to be incurred (see previous bullet)
 - Chief of the Public Safety and Homeland Security Bureau must approve the relocation plan
- D Block Auction Winner must place \$10M (or the amount agreed to in the relocation plan) in a trust account established by the Public Safety Broadband Licensee before the D Block License will be granted
- Granted and pending 700 MHz Regional Plans must be amended to comply with the new band plan and service rules by November 23, 2007

The FCC released a Public Notice related to the August 30, 2007 deadlines earlier this month. The PN can be downloaded at:

http://fjallfoss.fcc.gov/edocs_public/attachmatch/DA-07-3644A1.doc

Discussion followed.

Ken Hughes questioned the mention of a 2010 census date in the latest draft. The Chair explained that was a typo and would be corrected in the next draft.

It was brought up and discussed that the plan should have stronger and more specific language requiring participation in the statewide 700 MHz. P25 system, or in a regional system that is fully integrated into this statewide system in accordance with the “system of systems” concept. The Chair stated that he would draft language to that effect and place it in the next draft.

Next there was a discussion as to the status of the CAPRAD assignments and the need for those to be redone on a nationwide basis before the plan could be submitted for approval.

There being no further business the meeting was adjourned.

October 24, 2007 – Springfield, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
OCTOBER 24, 2007
SPRINGFIELD, LOUISIANA

Meeting called to order at 9:10 AM by Chairman William Vincent. He briefly reviewed how the FCC set up the 700 MHz band, and its' allocation of public safety frequencies within the band. One section was a geographic "state license", for use by states' for their use as they see fit. All coordination for the state licenses is the responsibility of the state licensee. The second (and largest) section is the general use allocation, for which this Regional Planning Committee (RPC) is tasked with developing/managing. The third section is the "Interoperability" section. Currently, the Louisiana SIEC is in charge of the state license as well as the interoperability frequencies.

The "State License" frequencies will not be sufficient to provide all of the necessary frequencies for users of the "State License" system. Language has been added to Region 18's plan, which will allow it to supplement the state license in areas where frequencies are needed. Additionally, a cooperative effort between the State and the local authorities must be in place before any channels will be released to the state license in that local area.

The latest copy of the Region 18 700 MHz Plan is located on the states' SIEC website.
<http://siec.louisiana.gov/metadot/index.pl?iid=2386&isa=Item&op=show>

Since the last meeting, a typographical error regarding census dates has been fixed. Stronger language has been added requiring greater cooperation among users in the different areas (or regions) of the state. Systems without interoperability capability will not be allowed.

The draft language is worked up by consensus, and no voting is done during the drafting of the Region 18 700 Mhz plan except for approving the final draft. Nothing in these drafts are final until after the final draft is approved by a vote of the Region 18 membership in attendance at that meeting.

A question was raised about the language in the drafts about a "requirement" that independent systems not be allowed and that only the state system or "regional systems" be allowed (section 6.2, paragraph 5). Discussion followed, with the chair stating he would make changes in the next draft that everyone would likely agree with. All systems should be interoperable with the state system in addition to being able to talk to all parish agencies within that parish.

Appendix "I" has been added. It lays out all the frequencies under the new band plan from the FCC. A few errors were detected and corrected and should be in the next draft of the plan.

The original 700 MHz public safety band plan has been shuffled around (as expected). It was understood that major changes were being considered and that major changes have

now been ordered (FCC 07-132). A nationwide public safety broadband network is part of this Order. It will be built to public safety standards, but operated by a private contractor with oversight by a public safety broadband trust. Excess bandwidth will be utilized by the commercial sector, but will always be available for immediate recall by public safety entities as needed. The Region 18 plan is really beginning to take shape. However, due to 700 MHz public safety spectrum being shuffled around, we have to wait for the new "Sorting" of the frequencies in CAPRAD, which is the program where the allocating of the 700 MHz spectrum takes place. By the time this new sort is completed (hopefully early next year), we should be ready to send our plan to the adjacent regions for their evaluation and approval.

There being no further business, the meeting adjourned at 10:00 a.m.

November 14, 2007 – Baton Rouge, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
NOVEMBER 14, 2007
BATON ROUGE, LA

Meeting called to order at 10:05 by vice-chairman Mike Musselman.

Section 6.2, Paragraph 5 has been reworded, with the new language read aloud to everyone in attendance. Discussion followed with everyone agreeing that the new language would not cause any problems for any local systems trying to get established. Several technical error found in the last version have been corrected per earlier conversation with Bill Vincent (Chair – absent from this meeting due to a scheduling conflict). Everyone was reminded that the maximum number of conventional mode channels is six (6.25 kHz); or three (12.5 kHz); or 2 (25 kHz) channels.

Regarding CAPRAD, Bette advised that she talked with Sean O’Hara of Syracuse Research Corp. earlier this week. He had performed the original CAPRAD database sort. He put in a bid to do the new sort, but the bid had yet to be awarded by the FCC. Sean advised Bette that from the date of the contract awarding, it would be three months before the finished product would be delivered. Bette reminded everyone in attendance that the FCC does not mandate the use of CAPRAD. All local plans have until January 31st, 2008 to submit modifications to their old plans to conform with the new 700 MHz public safety plan realignment. Discussion followed.

The national licensee had not yet been named for broadband, but it is expected to be the Public Safety Broadband Trust.

Mike Musselman advised the members present that, per Bill Vincent, the plan was mostly complete, except for the CAPRAD resort, and that is what we are now waiting on. Ken Hughes questioned the delay, stating that “there is already frequencies assigned”. He suggested that we adopt the repack, shifting the lower three MHz up by five MHz and shift the upper three MHz down one MHz of the old plan to match the new channel configuration. Bette suggested that we go ahead and approve the plan after the changes are made to match the old CAPRAD sort with the new band plan, and then modify the plan later as necessary. Mike Musselman agreed to go ahead and begin making the necessary transitions to the frequency assignments. Ken Hughes asked that the plan be ready to be approved by the next meeting so that it can be voted on and sent to the adjacent regions for their consideration and approval. Ken made a motion that we accept the CAPRAD plan, as is, making the necessary modifications to bring the existing frequencies into compliance with the new band plan. The motion was seconded by Curtis Bowers. No new discussion followed. Motion passed unanimously.

January 3rd, 2008 and January 24th, 2008 were discussed as possible next meeting dates. This information will be passed on to the Chairman and he will schedule the next meeting and put out the notices depending on scheduling and availability.

Discussion then questioned Appendix A, Section 2.1, Paragraph 2 regarding the validity of 47 CFR 90.20 in 700 MHz planning as 90.523 contains all of the eligibility requirements needed, and that the description in parenthesis in sentence three be struck. Motion made by Curtis Bowers to strike “47 CFR 90.20” and “(e.g. police, fire, EMS, highway)” from paragraph two in section 2.1 of Appendix A. Seconded by Mike Murphy. No new discussion. Motion passed unanimously.

There being no further business, the meeting adjourned at 11:03.

January 24, 2008 – Lafayette, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)

JANUARY 24, 2008

LAFAYETTE, LA

Mr. William Vincent welcomed everyone to Lafayette with an invitation to re-visit Lafayette during the five day period leading up to Mardi Gras as Lafayette Parish 911 will have their mobile PSAP in operation. Everyone was invited to see it in action, but to please call first so that they could be prepared ahead of time.

Meeting called to order at 13:30 by Chairman Vincent. The intent of this meeting is to review, then with concurrence of the membership present, approve the Region 18 700 MHz plan. A brief recap of the 700 MHz spectrum was explained (state license, interoperability channels, and general use allocation). The Louisiana SIEC is in charge of the state license and the interoperability channels, while the Region 18 700 MHz RPC is responsible for the general use allocation.

Since the last meeting, typographical errors in Appendix I, the Table of Contents, and a header in the first public notice have been corrected. Several small missing items were filled in and the Table of Contents was completed. . As requested at the last meeting, the original CAPRAD sort has been modified. The lower three MHz were shifted up five megahertz and the upper three MHz were shifted down one megahertz to comply with the new band plan from the FCC. Mike Musselman is credited with making the changes to the band plan manually. Bette Rinehart with Motorola is credited with error checking Mike's work. Only a few typographical errors were found and corrected.

The Chair opened the floor for any comments or concerns.

Section 3.2 (B) Discussed terminology of “encourages” vs. “required” in respect to frequency give backs. After discussion, it was decided to leave the wording as is.

Section 3.2 (C), top of page 11, last bullet – After discussion, changed the wording to: “A statement notifying the Director of Homeland Security & Emergency Preparedness of the applicable parish(es) that the system is being applied for.”

Section 3.2 (C), last paragraph – added “infrastructure costs.” The paragraph should now read: “With the submission of a showing proving, within the technical and administrative requirements of the Plan, that there are not sufficient state controlled frequencies (state license, applicable interoperability allocations, and air-ground) for use or reuse to build out the State of Louisiana 700 MHz. system within a particular parish, and that use of the system without infrastructure costs or user fees has been offered to local subscribers belonging to eligible entities with daily operations within that parish, the State of Louisiana shall be eligible to apply for and be licensed for frequencies under this Plan, under the same conditions and requirements applicable to all other eligible entities.

Section 3.1 – A question was asked as to how the membership of the Region 18 Review Committee is selected. Lengthy discussion followed. Eventually, a motion was made by

Larry Landry, seconded by Anthony Summers “To leave section 3.1 alone for now and revisit later with any potential revised wording”. No further discussion on this issue. There were numerous yeas and nobody opposed. Motion carried.

Section 3.4 – Discussed all of the wording in section 3.4. Motion made by Ken Hughes, seconded by Mike Murphy to “Delete all wording from Section 3.4 except for the last sentence”. No further discussion followed on this issue. There were numerous yeas and nobody opposed. Motion carried. The last sentence reads “In order to promote spectrum efficiency, Region 18 will ensure that systems allocated 25 KHz channel blocks will utilize all of the channel and not ‘orphan’ any portions of a system designated channel. (See Section 6.3)”

Section 6.2, Paragraph 5 – Added “and applicable region(al) Tactical Interoperability Communications Plan” to the end of the last sentence. The sentence should now read: “In any case, all subscriber units shall be fully interoperable in the Louisiana 700 MHz P25 statewide system in accordance with the State of Louisiana Tactical Interoperability Communications Plan and applicable region(al) Tactical Interoperability Communications Plan”.

Section 6.5.2 – “Loading Tables Voice Channels” were discussed regarding the definition of “Emergency” vs. “Non-Emergency”. It was decided among everyone present to leave this item alone and take no further action on Section 6.5.2.

Section 7.2 – Tactical Channels: The “Nationwide 800 MHz Band Public Safety Interoperability Channels” table listed was questioned as to why it is listed in a 700 MHz Plan. The reason given by Chairman Vincent was that “The SIEC has adopted the contents of this table as a part of its’ interoperability plan for 700 MHz users”. A question was posed as to why the 700 MHz interoperability channels were not listed. They were referred to Appendix E, where the FCC designated interoperability channel information is located. There is no State of Louisiana designated 700 MHz interoperability channels at this time. The consensus among the members present is to wait for the Louisiana SIEC to designate their official 700 MHz interoperability channels, and then modify our plan at that time, if necessary.

Appendix A, Section 3.3 – Officers holding office “for life”, without any type tenure limitation was questioned. Discussion followed. Motion by Mike Murphy, seconded by Anthony Summers to have Appendix A, Section 3.3 read as follows: “Tenure. The officers shall hold office for a term of two years or in each case until he or she sooner dies, resigns, is removed, or becomes disqualified.” Additional discussion followed. There were numerous yeas and nobody opposed. Motion carried.

Everybody was given an additional opportunity to express any comments or other concerns about the plan.

A motion was made by Mike Sigur, seconded by Mike Murphy “To adopt the plan as amended”. There were numerous yeas and nobody opposed. Motion carried.

Chairman Vincent then advised everyone the next steps which would be taken to get the plan down the path to the FCC. Meeting Adjourned at 15:09

July 16, 2015 – Baton Rouge, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)

JULY 16, 2015
BATON ROUGE, LA

Meeting was called to order at 1:35 pm by Chairman Lloyd Miller with a quick overview of the agenda.

An overview of FCC Dockets 14-172 and 15-476 was provided by Mike Musselman.

Mike Musselman displayed on a screen and described all of the proposed changes to be made to the plan. Bill Vincent described for the membership in attendance the “how and why” the allocations were modified by the FCC.

A motion was made by Bill Vincent to approve all of the changes to the Region 18 700 MHz Plan as submitted. Seconded by Anthony Summers. Motion carried.

Mike then addressed the use of CAPRAD. He stated that CAPRAD has not been used in several years and therefore, the data in it is corrupt. Bill advised the problem with CAPRAD was that there was no way to push the application to the FCC and therefore, double work was being performed (in CAPRAD per the rules and in Spectrumwatch so the application could be sent to a coordinator). Discussion followed. Mike stated he would follow-up with the NRPC to find out if this major issue has been resolved or not.

Election of Officers:

Per the By-Laws, the only required position is the Chair. Discussion followed. The consensus in attendance stated they wanted only a Vice-Chair in addition to the Chair. Motion made by Bill Vincent, seconded by Julio Peck to have only a Chair and Vice-Chair as officers for the Region 18 700 MHz RPC. Motion carried.

The floor was opened up for nominations for Chair. Motion made by Bill Vincent, seconded by Julio Peck to nominate Mike Musselman as Chair of the Region 18 700 MHz RPC. Motion carried. Mike Musselman accepted the position.

The floor was opened up for nominations for Vice-Chair. Lloyd Miller was nominated but he declined, stating he would be retiring in the near future. Anthony Summers was nominated for Vice-Chair by Julio Peck, seconded by Tammy Armand. Motion carried. Anthony Summers accepted the position.

Motion to adjourn made by Perry Vincent, seconded by Richard McGuire. Motion carried. Meeting adjourned at 2 PM.

July 13, 2017 – Gonzales, LA

PROCEEDINGS OF THE LOUISIANA (REGION 18)
REGIONAL PLANNING COMMITTEE (RPC)
JULY 13, 2017
GONZALES, LA

Meeting was called to order at 1:00 pm by Chairman Michael Musselman.

Because of a tour of a new dispatch facility nearby, William (Bill) Vincent was the only other person remaining for the meeting.

Election of Officers:

Bill Vincent nominated Michael Musselman to continue as Chair of the Region 18 700 MHz Committee. No other nominations were received. Michael accepted the position.

Michael Musselman nominated William (Bill) Vincent to serve as Vice-Chair of the Region 18 700 MHz Committee. No other nominations were received. Bill accepted the position.

Since there was no other business to conduct, Bill made a motion to adjourn at 1:06 pm. Motion carried.

Project 25 Common Air Interface Interoperability channel parameters

Certain common P25 parameters need to be defined to ensure digital radios operating on the 700 MHz Interoperability Channels can communicate. This is analogous to defining the common CTCSS tone used on NPSPAC analog Interoperability channels.

Network Access Code

In the project 25 Common Air Interface definition, the Network Access Code is analogous to the use of CTCSS and CDCSS signals in analog radio systems. It is a code transmitted in the pre-amble of the P25 signal and repeated periodically throughout the transmission. Its purpose is to provide selective access to and maintain access to a receiver. It is also to block nuisance and other co-channel signals. There are up to 4096 of these NAC codes. For ease of migration in other frequency bands, a NAC code table was developed which shows a mapping of CTCSS and CDCSS signals into corresponding NAC codes. Document TIA/EIA TSB102.BAAC contains NAC code table and other Project 25 Common Air Interface Reserve Values.

Use of corresponding code \$293.00 is required for the 700 MHz Interoperability Channel NAC code.

Talk group ID

In the project 25 Common Air Interface definition, the Talk group ID on conventional channels is analogous to the use of talk groups in trunking. In order to ensure that all users can communicate, all units should use a common Talk group ID.

Recommendation: Use P25 default value for Talk group ID = \$0001

Manufacturer's ID

The Project 25 Common Air Interface allows the ability to define manufacturer specific functions. In order to ensure that all users can communicate, all units should not use a specific Manufacturer's ID, but should use the default value of \$00.

Message ID

The Project 25 Common Air Interface allows the ability to define specific message functions. In order to ensure that all users can communicate, all units should use the default Message ID for unencrypted messages of \$000000000000000000000000.

Encryption Algorithm ID and Key ID

The Project 25 Common Air Interface allows the ability to define specific encryption algorithms and encryption keys. In order to ensure that all users can communicate, encryption should not be used on Interoperability Channels. All units should use the default Algorithm ID for unencrypted messages of \$80 and default Key ID for unencrypted messages 0000.

Appendix F NCC 700 MHz Pre-Assignment Rules/Recommendations

Introduction

A process for doing the initial block assignments of 700 MHz channels before details of actual system deployments is required. In this initial phase, there is little actual knowledge of what specific equipment is to be deployed and where the sites will be. As a result, a high level simplified method is proposed to establish guidelines for frequency coordination. When actual systems are deployed, additional details will be known and the system designers will be required to select specific sites and supporting hardware to control interference.

Overview

Assignments will be based on a defined service area of each applicant. For Public Safety entities this will normally be a geographically defined area such as city, county or by a data file consisting of line segments creating a polygon that encloses the defined area.

For co-channel assignments, the 40dB μ contour will be allowed to extend beyond the defined service area by 3 to 5 miles, depending on the type of environment, urban, suburban or low density. The interfering co-channel 5 dB μ will be allowed to touch but not overlap the 40 dB μ contour of the system being evaluated. All contours are (50,50).

For adjacent and alternate channels, the interfering channels 60 dB μ will be allowed to touch but not overlap the 40 dB μ contour of the system being evaluated. All contours are (50,50).

7.4.1.1 Discussion

The FCC limits the maximum field strength to 40 dB relative to 1 μ V/m (customarily denoted as 40 dB μ). It is assumed that this limitation will be applied similarly to the way it is applied in the 821-

824/866/869 MHz band. That is, a 40 dB μ field strength can be deployed up to a defined distance from the edge of the service area, based on the size of the service area or type of applicant, i.e. city, county or statewide system. This is important as the potential for interference from CMRS infrastructure demands that public safety systems have adequate margins for reliability in the presence of interference. The value of 40 dB μ corresponds to a signal of -92.7 dBm, received by a half-wavelength dipole ($\lambda/2$) antenna. The thermal noise floor for a 6.25 kHz receiver would be in the range of -126 dBm, so there is a margin of approximately 33 dB available for “noise limited” reliability. Figure 1 shows show the various interfering sources and how they accumulate to form a composite noise floor that can be used to determine the “reliability” or probability of achieving the desired performance in the presence of various interfering sources with differing characteristics.

Allowing for a 3 dB reduction in the available margin due to CMRS OOB noise lowers the reliability and/or the channel performance of Public Safety systems. TIA TR8 made this allowance during the meetings in Mesa, AZ, January 2001. In addition, there are various channel bandwidths with different performance criteria and unknown/adjacent and alternate channel assignments need to be accounted for. The co-channel and adjacent/alternate sources are shown in the right hand side of Figure 1. There would be a single co-channel source, but potentially several adjacent or alternate channel sources involved.

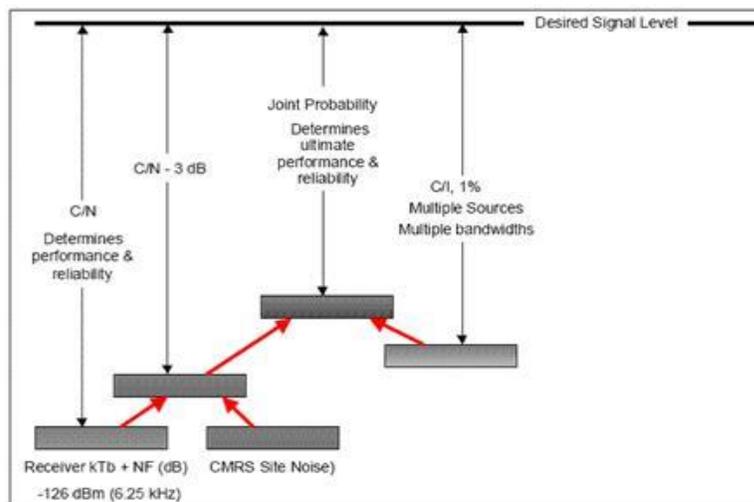

Figure 1 - Interfering Sources Create A “Noise” Level Influencing Reliability

It is recommended that co-channel assignments limit the C/I at the edge (worst case mile) be sufficient to limit that interference to <1%. A C/I ratio of 26.4 dB plus the required capture value required to achieve this goal. A 17 - 20 dB C/N is required to achieve channel performance. Table 1 shows estimated performance considering the 3 dB noise floor rise at the 40 dB μ signal level. Performance varies due to the different C/N requirements of the different modulations and channel bandwidths. These values are appropriate for a mobile on the street, but are considerably short to provide reliable communications to portables inside buildings.

Comparison of Joint Reliability for various configurations				
Channel Bandwidth	6.25 kHz	12.5 kHz	12.5 kHz	25.0 kHz
Receiver ENBW (kHz)	6	6	9	18
Noise Figure(10 dB)	10	10	10	10
Receiver Noise Floor (dBm)	-126.22	-126.22	-124.46	-121.45
Rise in Noise Floor (dB)	3.00	3.00	3.00	3.00
New Receiver Noise Floor (dB)	-123.22	-123.22	-121.46	-118.45
40 dBu = -92.7 dBm	-92.7	-92.7	-92.7	-92.7
Receiver Capture (dB)	10.0	10.0	10.0	10.0
Noise Margin (dB)	30.52	30.52	28.76	25.75
C/N Required for DAQ = 3	17.0	17.0	18.0	20.0
C/N Margin (dB)	13.52	13.52	10.76	5.75
Standard deviation (8 dB)	8.0	8.0	8.0	8.0
Z	1.690	1.690	1.345	0.718
Noise Reliability (%)	95.45%	95.45%	91.06%	76.37%
C/I for <1% prob of capture	36.4	36.4	36.4	36.4
I (dBu)	3.7	3.7	3.7	3.7
I (dBm)	-129.0	-129.0	-129.0	-129.0
Joint Probability (C & I)	94.2%	94.2%	90.4%	75.8%
40 dBu = -92.7 dBm @ 770 MHz				

Table 1 Joint Probability For Project 25, 700 MHz Equipment Configurations.

To analyze the impact of requiring portable in building coverage, several scenarios are presented. The different scenarios involve a given separation from the desired sites. Then the impact of simulcast is included to show that the 40 dB μ must be able to fall outside the edge of the service area. From the analysis, recommendations of how far the 40 dB μ extensions should be allowed to occur are made.

Table 2 Estimates urban coverage where simulcast is required to achieve the desired portable in building coverage. Several assumptions are required to use this estimate.

- Distance from the location to each site. Equal distance is assumed.
- CMRS noise is reduced when entering buildings. This is not a guarantee as the type of deployments is unknown. It is possible that CMRS units may have transmitters inside buildings. This could be potentially a large contributor unless the CMRS OOB is suppressed to TIA's most recent recommendation and the "site isolation" is maintained at 65 dB minimum.
- The 40 dB μ is allowed to extend beyond the edge of the service area boundary.
- Other configurations may be deployed utilizing additional sites, lower tower heights, lower ERP and shorter site separations.

Estimated Performance at 2.5 miles from each site				
Channel Bandwidth	6.25 kHz	12.5 kHz	12.5 kHz	25.0 kHz
Receiver Noise Floor (dBm)	-126.20	-126.20	-124.50	-118.50
Signal at 2.5 miles (dBm)	-72.7	-72.7	-72.7	-72.7
Margin (dB)	53.50	53.50	51.80	45.80
C/N Required for DAQ = 3	17.0	17.0	18.0	20.0
Building Loss (dB)	20	20	20	20
Antenna Loss (dBd)	8	8	8	8

Reliability Margin	8.50	8.50	5.80	-2.20
Z	1.0625	1.0625	0.725	-0.275
Single Site Noise Reliability (%)	85.60%	85.60%	76.58%	39.17%
Simulcast with 2 sites	97.93%	97.93%	94.51%	62.99%
Simulcast with 3 sites	99.70%	99.70%	98.71%	77.49%
Simulcast with 4 sites	99.96%	99.96%	99.70%	86.30%

Table 2, Estimated Performance From Site(s) 2.5 Miles From Typical Urban Buildings.

Table 2 shows for the example case of 2.5 miles that simulcast is required to achieve public safety levels of reliability. The difference in performance margin requirements would require more sites and closer site-to-site separation for wider bandwidth channels.

Figures 2 and 3 show how the configurations would potentially be deployed for a typical site with 240 Watts ERP. This is based on:

- 75 Watt transmitter, 18.75 dBW
 - 200 foot tower
 - 10 dBd 180 degree sector antenna +10.0 dBd
 - 5 dB of cable/filter loss. - 5.0 dB
- 23.75 dBW \approx 240 Watts (ERPd)**

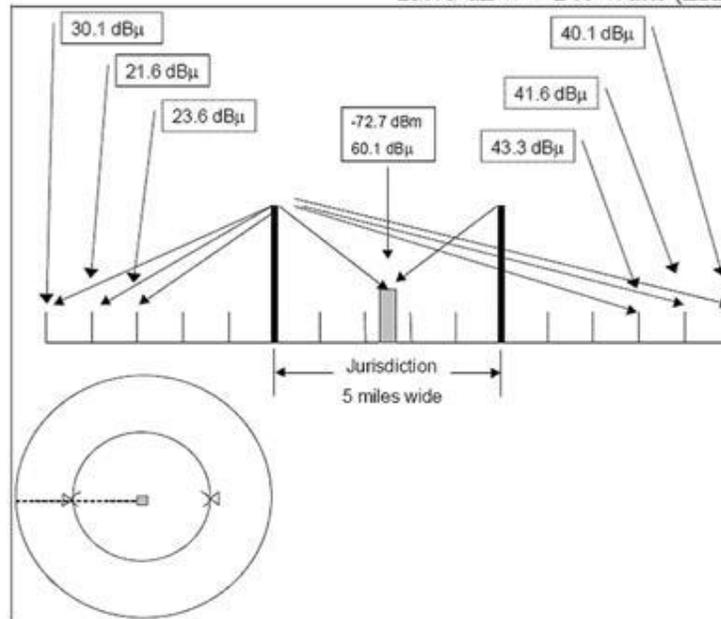

Figure 2 - Field Strength From Left Most Site.

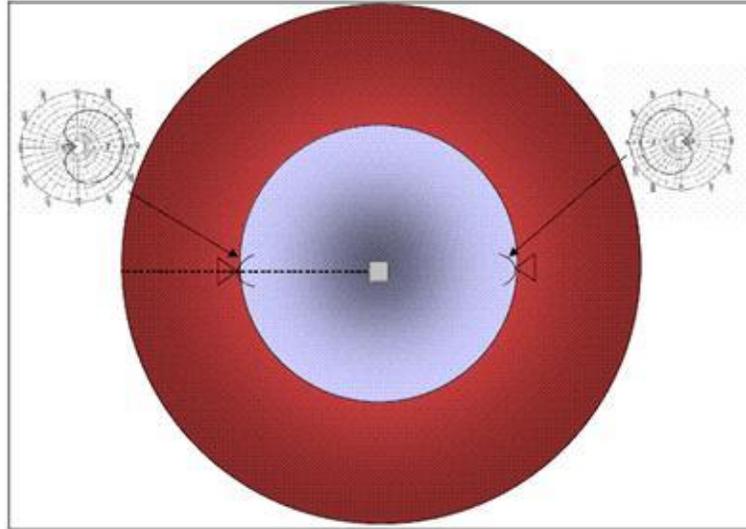

Figure 3 - Antenna Configuration Required To Limit Field Strength Off "Backside"

Figure 2 is for an urbanized area with a jurisdiction of a 5-mile circle. To provide the necessary coverage to portables in buildings at the center of the jurisdiction requires that the sites be placed along the edge of the service area utilizing direction antennas oriented toward the center of the service area (Figure 3). In this case, at 5 miles beyond the edge of the service area, the sites would produce composite field strength of approximately $40 \text{ dB}\mu$. Since one site is over 10 dB dominant, the contribution from the other site is not considered. The control of the field strength behind the site relies on a 20 dB antenna with a Front to Back Ratio (F/B) specification as shown in Figure 3. This performance may be optimistic due to backscatter off local obstructions in urbanized areas. However, use of antennas on the sides of buildings can assist in achieving better F/B ratios and the initial planning is not precise enough to prohibit using the full 20 dB.

The use of a single site at the center of the service area is not normally practical. To provide the necessary signal strength at the edge of the service area would produce field strength 5 miles beyond in excess of $44 \text{ dB}\mu$. However, if the high loss buildings were concentrated at the service area's center, then potentially a single site could be deployed, assuming that the building loss sufficiently decreases near the edge of the service area allowing a reduction in ERP to achieve the desired reliability.

The down tilting of antennas to control the $40 \text{ dB}\mu$ is not practical as the difference in angular discrimination from a 200-foot tall tower at 2.5 miles and 10 miles is approximately 0.6 degrees.

Tables 3 and 4 represent the same configuration, but for less dense buildings. In these cases, the distance to extend the 40 dBm can be determined from Table Z. Recommendations are made in Table 6.

Estimated Performance at 3.5 miles from each site				
Channel Bandwidth	6.25 kHz	12.5 kHz	12.5 kHz	25.0 kHz
Receiver Noise Floor (dBm)	-126.20	-126.20	-124.50	-118.50
Signal at 2.5 miles (dBm)	-77.7	-77.7	-77.7	-77.7
Margin (dB)	48.50	48.50	46.80	40.80
C/N Required for DAQ = 3	17.0	17.0	18.0	20.0
Building Loss (dB)	15	15	15	15
Antenna Loss (dBd)	8	8	8	8
Reliability Margin	8.50	8.50	5.80	-2.20
Z	1.0625	1.0625	0.725	-0.275
Single Site Noise Reliability (%)	85.60%	85.60%	76.58%	39.17%
Simulcast with 2 sites	97.93%	97.93%	94.51%	62.99%
Simulcast with 3 sites	99.70%	99.70%	98.71%	77.49%
Simulcast with 4 sites	99.96%	99.96%	99.70%	86.30%

Table 3 - Lower Loss Buildings, 3.5 Mile From Site(s)

Estimated Performance at 5.0 miles from each site				
Channel Bandwidth	6.25 kHz	12.5 kHz	12.5 kHz	25.0 kHz
Receiver Noise Floor (dBm)	-126.20	-126.20	-124.50	-118.50
Signal at 2.5 miles (dBm)	-82.7	-82.7	-82.7	-82.7
Margin (dB)	43.50	43.50	41.80	35.80
C/N Required for DAQ = 3	17.0	17.0	18.0	20.0
Building Loss (dB)	10	10	10	10
Antenna Loss (dBd)	8	8	8	8
Reliability Margin	8.50	8.50	5.80	-2.20

Simulcast with 3 sites	99.70%	99.70%	98.71%	77.49%
Simulcast with 4 sites	99.96%	99.96%	99.70%	86.30%

Table 4 - Low Loss Buildings, 5.0 Miles From Site(s)

Note that the receive signals were adjusted to offset the lowered building penetration loss. This produces the same numerical reliability results, but allows increasing the site to building separation and this in turn lowers the magnitude of the “overshoot” across the service area.

Table 5 shows the field strength for a direct path and for a path reduced by a 20 dB F/B antenna. This allows the analysis to be simplified for the specific example being discussed.

Overshoot Distance (mi)	Field Strength (dBμ)	20 dB F/B (dBμ)
1	73.3	53.3
2	63.3	43.3
2.5	60.1	40.1
3	57.5	37.5
4	53.3	33.5
5	50.1	30.1
...	...	
10	40.1	
11	38.4	
12	37.5	
13	36.0	
14	34.5	
15	33.0	

Table 5 - Field Strength Vs. Distance From Site

This allows the overshoot to be 11 miles so the extension of the 40 dbm can be 4 miles for suburbanized territory. For the more rural territory, the limit is the signal strength off the back of the antenna. So the result is that for various types of urbanized areas the offset of the 40 dbm should be:

Type of Area	Extension (mi.)
Urban (20 dB Buildings)	5
Suburban (15 dB Buildings)	4
Rural (10 dB Buildings)	3

Table 6 - Recommended Extension Distance Of 40 Dbμ Field Strength

The 40 dBμ can then be constructed based on the defined service area without having to perform an actual prediction. Since the 40 dBμ is beyond the edge of the service area, some relaxation in the level of I is reasonable. Therefore a 35 dB ration is recommended and is consistent with what is currently being licensed in the 821-824/866-869 MHz Public Safety band.

Co-Channel Recommendation

- Allow the constructed $40 \text{ dB}\mu (50,50)$ to extend beyond the edge of the defined service area by the distance indicated in Table 6.
- Allow the Interfering $5 \text{ dB}\mu (50,50)$ to intercept but not overlap the $40 \text{ dB}\mu$ contour.

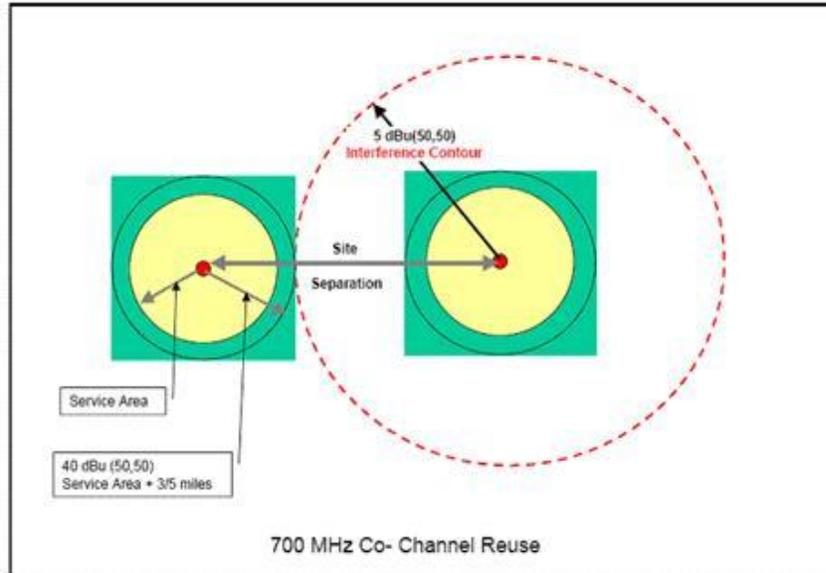

Figure 4 - Co-Channel Reuse Criterion

Adjacent and alternate Channel Considerations

Adjacent and alternate channels are treated as being noise sources that alter the composite noise floor of a victim receiver. Using the 47 CFR § 90.543 values of ACCP can facilitate the coordination of adjacent and alternate channels. The C/I requirements for $<1\%$ interference can be reduced by the value of ACCPR. For example to achieve an $X \text{ dB } C/I$ for the adjacent channel that is -40 dBc a C/I of $[X-40] \text{ dB}$ is required. Where the alternate channel ACP value is -60 dBc , then the $C/I = [X-60] \text{ dB}$ is the goal for assignment(s). There is a compounding of interference energy, as there are numerous sources, i.e. co channel, adjacent channels and alternate channels plus the noise from CMRS OOB.

There is insufficient information in 47 CFR § 90.543 to include the actual receiver performance. Receivers typically have “skirts” that allow energy outside the bandwidth of interest to be received. In addition, the FCC defines ACCP differently than does the TIA. The term used by the FCC is the same as the TIA definition of ACP. The subtle difference is that ACCP defines the energy intercepted by a defined receiver filter. ACP defines the energy in a measured bandwidth that is typically wider than the receiver. As a result, the FCC values are optimistic at very close spacing and somewhat pessimistic at wider spacing, as the typical receiver filter is less than the channel bandwidth.

In addition, as a channel bandwidth is increased, the total noise is allowed to rise, as it is initially defined in a 6.25 kHz channel bandwidth. However, the effect is diminished at very close spacing as the noise is rapidly falling off. At greater spacing, the noise is essentially flat and the receiver's filter limits the noise to the specified 3 dB rise in the thermal noise floor.

Digital receivers tend to be less tolerant to interference than analog. Therefore a 3 dB reduction in the $C/(I+N)$ can reduce a $DAQ = 3$ to a $DAQ = 2$ which is threshold to complete receiver muting. Therefore at least 17 dB plus the margin for keeping the interference below 1% probability requires a total margin of 43.4 dB. However, this margin would be at the edge of the service area and the 40 dB μ is allowed to extend past the edge of the service area.

Frequency drift is controlled by the FCC requirement for 0.4-ppm stability when locked. This equates to approximately a 1 dB standard deviation, which is negligible when associated with the recommended initial lognormal standard deviation of 8 dB and can be ignored.

Project 25 requires that a transceiver receiver have an ACIPR of 60 dB. This implies that an ACCPR ≥ 65 dB will exist for a "companion receiver". A companion receiver is one that is designed for the specific modulation. At this time the highest likelihood is that receivers will be deploying the following receiver bandwidths at the following channel bandwidths.

Estimated Receiver Parameters	
Channel Bandwidth	Receiver Bandwidth
6.25 kHz	5.5 kHz
12.5 kHz	5.5 or 9 kHz
25 kHz	18.0 kHz

Table 7 - Estimated Receiver Parameters

Based on 47 CFR ¶ 90.543 and the P25 requirement for an ACCPR ≥ 65 dB into a 6.0 kHz channel bandwidth and leaving room for a migration from Phase 1 to Phase 2, allows for making the simplifying assumption that 65 dB ACCPR is available for both adjacent 25 kHz block.

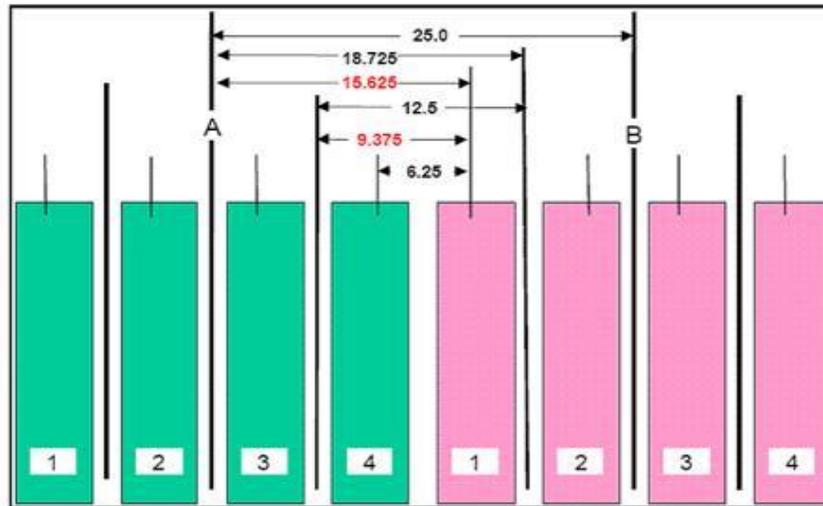

Figure 5, Potential Frequency Separations

Base initial (presorts) on 25 kHz channels. This provides the maximum flexibility by using 65 dB ACCPR for all but one possible combination of 6.25 kHz channels within the 25 kHz allotment.

Case	ACCPR
25 kHz	65 dB
18.725 kHz	65 dB
15.625 kHz	>40 dB
12.5 kHz	65 dB
9.375 kHz	>40 dB
6.25 kHz	65 dB

Table 8 - ACCPR Values For Potential Frequency Separations

All cases meet or exceed the FCC requirement. The most troublesome cases occur where the wider bandwidths are working against a Phase 2 narrowband 6.25 kHz channel. If system designers keep this consideration in mind and move the edge 6.25 kHz channels inward on their own systems, then a constant value of 65 dB ACCPR can be applied across all 25 kHz channels regardless of what is eventually deployed.

For other blocks, it must be assumed that transmitter filtering in addition to transmitter performance improvements with greater frequency separation will further reduce the ACCPR.

Therefore it is recommended that a consistent value of 65 dB ACCPR be used for coordinating adjacent 25 kHz channel blocks. Rounding to be conservative due to the possibility of multiple sources allows the "I" contour to be approximately 20 dB above the 40 dBμ contour, 60 dBμ.

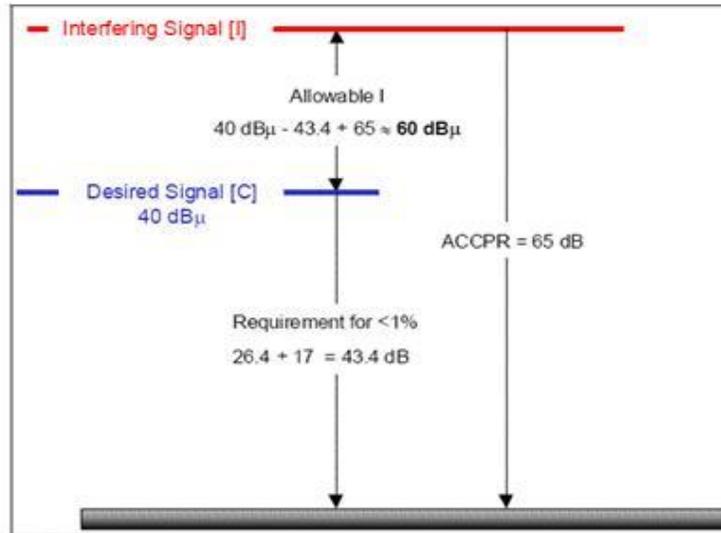

Figure 6 - Adjusted Adjacent 25 kHz Channel Interfering Contour Value

An adjacent Interfering (25 kHz) channel shall be allowed to have its 60 dB μ (50,50) contour touch but not overlap the 40 dB μ (50,50) contour of a system being evaluated. Evaluations should be made in both directions.

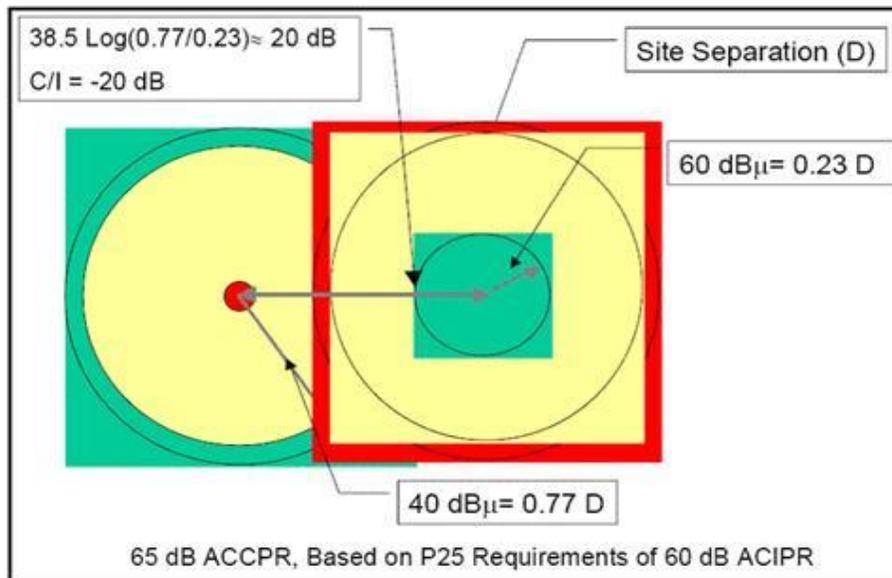

Figure 7 - Example Of Adjacent/Alternate Overlap Criterion

This simple method is only adequate for presorting large blocks to potential entities. A more detailed analysis should be executed in the actual design phase to take all the issues into consideration. Additional factors that should be considered include:

- Degree of Service Area Overlap
- Different size of Service Areas
- Different ERP's and HAAT's
- Actual Terrain and Land Usage
- Differing User Reliability Requirements
- Migration from Project 25 Phase 1 to Phase 2
- Actual ACCP
- Balanced Systems
- Mobiles vs. Portables
- Use of voting
- Use of simulcast
- Radio specifications
- Simplex Operation
- Future unidentified requirements.

Special attention needs to be paid to the use of simplex operation. In this case, an interferer can be on an offset adjacent channel and in extremely close proximity to the victim receiver. This is especially critical in public safety where simplex operations are frequently used at a fire scene or during police operation. This type operation is also quite common in the lower frequency bands. In those cases, evaluation of base-to-base as well as mobile-to-mobile interference should be considered and evaluated.

Carrier to Interference Requirements

There are two different ways that interference is considered.

- Co Channel
- Adjacent and Alternate Channels

Both involve using a C/I ratio. The C/I ratio requires a probability be assigned. For example, a 10% Interference is specified; the C/I implies 90% probability of successfully achieving the desired ratio. At 1% interference, means that there is a 99% probability of achieving the desired C/I.

$$\frac{C}{I} \% = \frac{1}{2} \cdot \operatorname{erfc} \left(\frac{\frac{C}{I} \text{ margin}}{2\sigma} \right) \quad (1)$$

This can also be written in a form using the standard deviate unit (Z). In this case the Z for the desired probability of achieving the C/I is entered. For example, for a 90% probability of achieving the necessary C/I, $Z = 1.28$.

$$\frac{C}{I} \% = Z \cdot \sqrt{2} \cdot \sigma \quad (2)$$

The most common requirements for several typical lognormal standard deviations (σ) are included in the following table based on Equation (2).

Location Standard Deviation (σ) dB	5.6	6.5	8	10
Probability %				
10%	10.14 dB	11.77 dB	14.48 dB	18.10 dB
5%	13.07 dB	15.17 dB	18.67 dB	23.33 dB
4%	13.86 dB	16.09 dB	19.81 dB	24.76 dB
3%	14.90 dB	17.29 dB	21.28 dB	26.20 dB
2%	16.27 dB	18.88 dB	23.24 dB	29.04 dB
1%	18.45 dB	21.42 dB	26.36 dB	32.95 dB

Table A1 - Probability Of Not Achieving C/I For Various Location Lognormal Standard Deviations

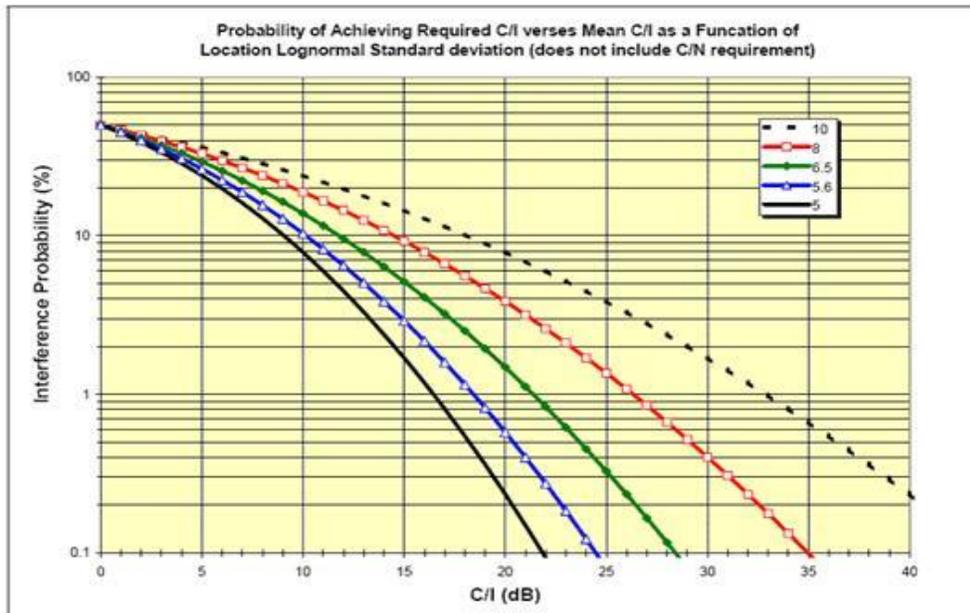

Figure A1, Probability Of Achieving Required C/I As A Function Of Location Standard Deviation

For co-channel the margin needs to include the "capture" requirement. When this is done, then a 1% probability of co channel interference can be rephrased to mean, there is a 99% probability that the "capture ratio" will be achieved. The capture ratio varies with the type of modulation. Older analog equipment has a capture ratio of approximately 7 dB. Project 25 FDMA is specified at 9 dB. Figure A1 shows the C/I requirement without including the capture requirement.

The 8 dB values for lognormal location standard deviation is reasonable when little information is available. Later when a detailed design is required, additional details and high-resolution terrain and land usage databases will allow a lower value to be used. The TIA recommended value is 5.6 dB. This provides the additional flexibility necessary to complete the design

To determine the desired probability that both the C/N and C/I will be achieved requires that a joint probability be determined. Figure A2 shows the effects of a family of various levels of C/N reliability and the joint probability (Y-axis) in the presence of various probabilities of Interference. Note that at 99% reliability with 1% interference (X-axis) that the reduction is nearly the difference. This is because the very high noise reliability is degraded by the interference, as there is little probability that the noise criterion will not be satisfied. At 90%, the 1% interference has a greater likelihood that it will occur simultaneously when the noise criterion not being met, resulting in a less degradation of the 90%

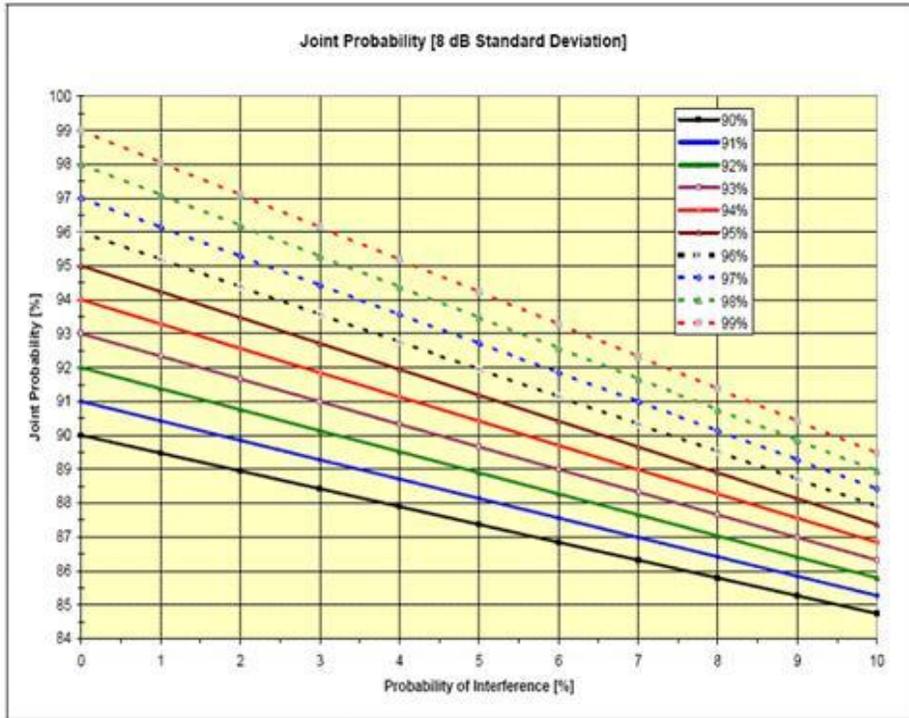

Figure A2 - Effect Of Joint Probability On The Composite Probability

For adjacent and alternate channels, the channel performance requirement must be added to the C/I ratio. When this is applied, then a 1% probability of adjacent/alternate channel interference can be rephrased to mean, there is a 99% probability that the “channel performance ratio” will be achieved.

APPENDIX H

Inter-Regional Coordination Procedures and Dispute Resolution Agreements

REGION 4

June 12, 2008

Mr. Bill Vincent
800 South Buchanan Street Parish Courthouse Basement
Lafayette, LA 70501-3286
Region 18 Chair

RE: Letter of Concurrence

After review of Louisiana Region 18 700 MHz plan, Arkansas Region 4 concurs. If the Arkansas Regional Planning Committee can be of further service please do not hesitate to contact us.

Sincerely,

Carl W. Jacobs
Region 4 Chair

Inter-Regional Dispute Resolution Agreement

Region 4

Page 1 of 4

*Inter-Regional Coordination Procedures
and
Procedures for Resolution of Disputes
That May Arise Under FCC Approved Plans*

I. Coordination Procedures

I. INTRODUCTION

1. This is a mutually agreed upon Inter –Regional Coordination Procedures Agreement (Agreement) by and between the following 700 MHz Regional Planning Committees, Region 18 and Region 4.

II. INTER-REGIONAL COORDINATION AGREEMENT

2. The following is the specific procedure for inter-regional coordination which has been agreed upon by Region 18 and Region 4 and which will be used by the Regions to coordinate with adjacent Regional Planning Committees.

- a. An application filing window is opened or the Region announces that it is prepared to begin accepting applications on a first-come/first-served basis.
- b. Applications by eligible entities are accepted.
- c. An application filing window (if this procedure is being used) is closed after appropriate time interval.
- d. Intra-regional review and coordination takes place, including a technical review resulting in assignment of channels.
- e. After intra-regional review, a copy of those frequency-specific applications requiring adjacent Region approval, including a definition statement of proposed service area, shall then be forwarded to the adjacent Region(s) for review.¹ This information will be sent to the adjacent Regional chairperson(s) using the CAPRAD database, or by email.

¹ If an applicant's proposed service area or interference contour extends into an adjacent Public Safety Region(s), the application must be approved by the affected Region(s). Service area shall normally be defined as the area included within the geographical boundary of the applicant, plus three (3) miles. Interference contour shall normally be defined as a 5 dBu co-channel contour or a 60 dBu adjacent channel

f. The adjacent Region reviews the application. If the application is approved, a letter of concurrence shall be sent, via the CAPRAD database or by email, to the initiating Regional chairperson within thirty (30) calendar days.

II. Dispute Resolution

(1) If the adjacent Region(s) cannot approve the request, the adjacent Region shall document the reasons for partial or non-concurrence, and respond within 10 (Ten) calendar days via email. If the applying Region cannot modify the application to satisfy the objections of the adjacent Region then, a working group comprised of representatives of the two Regions shall be convened within thirty (30) calendar days to attempt to resolve the dispute. The working group shall then report its findings within thirty (30) calendar days to the Regional chairpersons email (CAPRAD database).

Findings may include, but not limited to:

- (i) Unconditional concurrence;
- (ii) conditional concurrence contingent upon modification of applicant's technical parameters; or
- (iii) partial or total denial of proposed frequencies due to inability to meet co-channel/adjacent channel interference free protection to existing licensees within the adjacent Region.

(2) If the Inter-Regional Working Group cannot resolve the dispute, then the matter shall be forwarded for evaluation to the National Plan Oversight Committee (NPOC). Each Region involved in the dispute shall include a detailed explanation of its position, including

contour. Other definitions of service area or interference shall be justified with an accompanying *Memorandum of Understanding (MOU)* or other application documentation between agencies, i.e. mutual aid agreements.

engineering studies and any other technical information deemed relevant. The NPOC will, within thirty (30) calendar days, report its recommendation(s) to the Regional chairpersons via the CAPRAD database. The NPOC's decision may support either of the disputing Regions or it may develop a proposal that it deems mutually advantageous to each disputing Region.

g. Where adjacent Region concurrence has been secured, and the channel assignments would result in no change to the Region's currently Commission approved channel assignment matrix. The initiating Region may then advise the applicant(s) that their application may be forwarded to a frequency coordinator for processing and filing with the Commission.

h. Where adjacent Region concurrences has been secured, and the channel assignments would result in a change to the Region's currently Commission approved channel assignment matrix, then the initiating Region shall file with the Commission a Petition to Amend their current Regional plan's frequency matrix, reflecting the new channel assignments, with a copy of the Petition sent to the adjacent Regional chairperson(s).

i. Upon Commission issuance of an Order adopting the amended channel assignment matrix, the initiating Regional chairperson will send a courtesy copy of the Order to the adjacent Regional chairperson(s) and may then advise the applicant(s) that they may forward their applications to the frequency coordinator for processing and filing with the Commission.

III. CONCLUSION

3. IN AGREEMENT HERETO, Region 18 and Region 4 do hereunto set their signatures the day and year first above written.

Respectfully,

[all signatories to agreement]

Carl W. Jacobs By *H. Davis*

Inter-Regional Dispute Resolution Agreement

Region 23

Page 1 of 4

*Inter-Regional Coordination Procedures
and
Procedures for Resolution of Disputes
That May Arise Under FCC Approved Plans*

I. Coordination Procedures

I. INTRODUCTION

1. This is a mutually agreed upon Inter –Regional Coordination Procedures Agreement (Agreement) by and between the following 700 MHz Regional Planning Committees, Region 18 and Region 23.

II. INTER-REGIONAL COORDINATION AGREEMENT

2. The following is the specific procedure for inter-regional coordination which has been agreed upon by Region 18 and Region 23 and which will be used by the Regions to coordinate with adjacent Regional Planning Committees.
 - a. An application filing window is opened or the Region announces that it is prepared to begin accepting applications on a first-come/first-served basis.
 - b. Applications by eligible entities are accepted.
 - c. An application filing window (if this procedure is being used) is closed after appropriate time interval.
 - d. Intra-regional review and coordination takes place, including a technical review resulting in assignment of channels.
 - e. After intra-regional review, a copy of those frequency-specific applications requiring adjacent Region approval, including a definition statement of proposed service area, shall then be forwarded to the adjacent Region(s) for review.¹ This information will be sent to the adjacent Regional chairperson(s) using the CAPRAD database, or by email.

¹ If an applicant's proposed service area or interference contour extends into an adjacent Public Safety Region(s), the application must be approved by the affected Region(s). Service area shall normally be defined as the area included within the geographical boundary of the applicant, plus three (3) miles. Interference contour shall normally be defined as a 5 dBu co-channel contour or a 60 dBu adjacent channel

f. The adjacent Region reviews the application. If the application is approved, a letter of concurrence shall be sent, via the CAPRAD database or by email, to the initiating Regional chairperson within thirty (30) calendar days.

II. Dispute Resolution

(1) If the adjacent Region(s) cannot approve the request, the adjacent Region shall document the reasons for partial or non-concurrence, and respond within 10 (Ten) calendar days via email. If the applying Region cannot modify the application to satisfy the objections of the adjacent Region then, a working group comprised of representatives of the two Regions shall be convened within thirty (30) calendar days to attempt to resolve the dispute. The working group shall then report its findings within thirty (30) calendar days to the Regional chairpersons email (CAPRAD database).

Findings may include, but not limited to:

- (i) Unconditional concurrence;
- (ii) conditional concurrence contingent upon modification of applicant's technical parameters; or
- (iii) partial or total denial of proposed frequencies due to inability to meet co-channel/adjacent channel interference free protection to existing licensees within the adjacent Region.

(2) If the Inter-Regional Working Group cannot resolve the dispute, then the matter shall be forwarded for evaluation to the National Plan Oversight Committee (NPOC). Each Region involved in the dispute shall include a detailed explanation of its position, including

contour. Other definitions of service area or interference shall be justified with an accompanying *Memorandum of Understanding (MOU)* or other application documentation between agencies, i.e. mutual aid agreements.

engineering studies and any other technical information deemed relevant. The NPOC will, within thirty (30) calendar days, report its recommendation(s) to the Regional chairpersons via the CAPRAD database. The NPOC's decision may support either of the disputing Regions or it may develop a proposal that it deems mutually advantageous to each disputing Region.

g. Where adjacent Region concurrence has been secured, and the channel assignments would result in no change to the Region's currently Commission approved channel assignment matrix. The initiating Region may then advise the applicant(s) that their application may be forwarded to a frequency coordinator for processing and filing with the Commission.

h. Where adjacent Region concurrences has been secured, and the channel assignments would result in a change to the Region's currently Commission approved channel assignment matrix, then the initiating Region shall file with the Commission a Petition to Amend their current Regional plan's frequency matrix, reflecting the new channel assignments, with a copy of the Petition sent to the adjacent Regional chairperson(s).

i. Upon Commission issuance of an Order adopting the amended channel assignment matrix, the initiating Regional chairperson will send a courtesy copy of the Order to the adjacent Regional chairperson(s) and may then advise the applicant(s) that they may forward their applications to the frequency coordinator for processing and filing with the Commission.

III. CONCLUSION

3. IN AGREEMENT HERETO, Region 18 and Region 23 do hereunto set their signatures the day and year first above written.

Respectfully,

[all signatories to agreement]

I. Coordination Procedures

I. INTRODUCTION

1. This is a mutually agreed upon Inter –Regional Coordination Procedures Agreement (Agreement) by and between the following 700 MHz Regional Planning Committees, Region 18 and Region xx.

II. INTER-REGIONAL COORDINATION AGREEMENT

2. The following is the specific procedure for inter-regional coordination which has been agreed upon by Region 18 and Region 40 and which will be used by the Regions to coordinate with adjacent Regional Planning Committees.

- a. An application filing window is opened or the Region announces that it is prepared to begin accepting applications on a first-come/first-served basis.
- b. Applications by eligible entities are accepted.
- c. An application filing window (if this procedure is being used) is closed after appropriate time interval.
- d. Intra-regional review and coordination takes place, including a technical review resulting in assignment of channels.
- e. After intra-regional review, a copy of those frequency-specific applications requiring adjacent Region approval, including a definition statement of proposed service area, shall then be forwarded to the adjacent Region(s) for review.¹ This information will be sent to the adjacent Regional chairperson(s) using the CAPRAD database, or by email.

¹ If an applicant's proposed service area or interference contour extends into an adjacent Public Safety Region(s), the application must be approved by the affected Region(s). Service area shall normally be defined as the area included within the geographical boundary of the applicant, plus three (3) miles. Interference contour shall normally be defined as a 5 dBu co-channel contour or a 60 dBu adjacent channel

f. The adjacent Region reviews the application. If the application is approved, a letter of concurrence shall be sent, via the CAPRAD database or by email, to the initiating Regional chairperson within thirty (30) calendar days.

II. Dispute Resolution

(1) If the adjacent Region(s) cannot approve the request, the adjacent Region shall document the reasons for partial or non-concurrence, and respond within 10 (Ten) calendar days via email. If the applying Region cannot modify the application to satisfy the objections of the adjacent Region then, a working group comprised of representatives of the two Regions shall be convened within thirty (30) calendar days to attempt to resolve the dispute. The working group shall then report its findings within thirty (30) calendar days to the Regional chairpersons email (CAPRAD database).

Findings may include, but not limited to:

- (i) Unconditional concurrence;
- (ii) conditional concurrence contingent upon modification of applicant's technical parameters; or
- (iii) partial or total denial of proposed frequencies due to inability to meet co-channel/adjacent channel interference free protection to existing licensees within the adjacent Region.

(2) If the Inter-Regional Working Group cannot resolve the dispute, then the matter shall be forwarded for evaluation to the National Plan Oversight Committee (NPOC). Each Region involved in the dispute shall include a detailed explanation of its position, including

contour. Other definitions of service area or interference shall be justified with an accompanying *Memorandum of Understanding (MOU)* or other application documentation between agencies, i.e. mutual aid agreements.

engineering studies and any other technical information deemed relevant. The NPOC will, within thirty (30) calendar days, report its recommendation(s) to the Regional chairpersons via the CAPRAD database. The NPOC's decision may support either of the disputing Regions or it may develop a proposal that it deems mutually advantageous to each disputing Region.

g. Where adjacent Region concurrence has been secured, and the channel assignments would result in no change to the Region's currently Commission approved channel assignment matrix. The initiating Region may then advise the applicant(s) that their application may be forwarded to a frequency coordinator for processing and filing with the Commission.

h. Where adjacent Region concurrences has been secured, and the channel assignments would result in a change to the Region's currently Commission approved channel assignment matrix, then the initiating Region shall file with the Commission a Petition to Amend their current Regional plan's frequency matrix, reflecting the new channel assignments, with a copy of the Petition sent to the adjacent Regional chairperson(s).

i. Upon Commission issuance of an Order adopting the amended channel assignment matrix, the initiating Regional chairperson will send a courtesy copy of the Order to the adjacent Regional chairperson(s) and may then advise the applicant(s) that they may forward their applications to the frequency coordinator for processing and filing with the Commission.

III. CONCLUSION

3. IN AGREEMENT HERETO, Region 18 and Region 40 do hereunto set their signatures the day and year first above written.

Respectfully,

Date: 2-27-08

Re: Louisiana Region 18 700 MHz

Regional Plan Dear Mr. Musselman,
Region 23 received and reviewed your Region 18 700 MHz Planning Committee Documents. The plan includes both State and G A frequencies and the changes are all mainly organizational and operational in nature. The plan has been modified to cover TDMA narrow banding (6.25 MHz) but did not geographically relocate any frequencies.

I am pleased to report that Region 23 finds that the changes to the Region 18 Plan will have no impact on Region 23 and therefore is issuing this Letter of Concurrence (LOC) in response to your request.

Respectfully,

Tom Lariviere,
MSRPFAC
Chairman

Dear Mr. Musselman,

Region 40 has received your amended 700 MHz plan and submitted it to the committee for review and comment on Sept. 21, 2015. The Region 40 committee subsequently formally approved Region 18's plan.

Let this letter serve as the official written concurrence of Region 40 to your amended 700 MHz Regional Plan.

Sincerely,

Wanda McCarley
Chair, Region 40
